In the fifth day of his ordeal, O. L. Smell, the victim of the recent collapse, was finally extracted. A member of the rescue team reported that the procedure was quite taxing due to the ten yards from the surface to the collapse point. The victim had become unconscious several times during the attempt to reach him, but he regained consciousness after being administered sedatives.

Rescue operations were progressing, Flush informed us, “It sure does stink down there.” Once Mr. Smell arrived, he began digging twenty minutes later, rescue workers reported. Foreman, after talking to the victim, explained that they had removed the final soil to within ten feet of the gap. When questioned as to how the operations were progressing, Flush said, “I think we’re making some progress.”
