Freshmen, Sophomores
To Battle October 29
For Field Day Honors

One of the first big events awaiting the Class of '53 at Tech is Field Day, in which the freshmen will be pitted against the sophomores on the athletic field to fight for their class honor. This Tech institution, which has been located on the Charles since 1823, will take place this year on Saturday, October 29.

Field Day's athletic phase will consist of a football game, swimming meet, rowing race, relay race, tug-of-war. Following these events comes the hour in which the entire freshman and sophomore classes gather on Briggs Field and battle to capture each other's glove.

Big Dance Climaxes Day
Points are awarded to the winners of each event, with the class having the highest total score declared the winner. This day will then be climaxed by a big dance in Walker Memorial which will restore peaceful relations between the two classes.

The freshman will be coached and spirited in preparing for Field Day by the junior class, which specs the class of '52 while freshmen, and then repeats last year with a Field Day score of 253. The sophomore class will set as coaches to the sophomores. Since the sophomores are expected to win, this event, like the others, has been won by sophomores in the past by freshmen.

Sign Up at Fresh Weekend

Counselors and advisors for all Field Day events will be present at Freshman Weekend to supply more details and sign up prospective members. The counselors will be in residence to say, large turnouts for an event. It is suggested that freshmen try to give some fatherly, or at least big-brotherly advice to your younger brethren. Hurry up...!

1. It is against the law to either buy or sell liquor in Massachusetts unless you are 21. We therefore advise you if you are someone under 21 never to try to sell or obtain some sort of forged documents rating your age to the necessary level. The law is best met and the buyer is cheaper.
2. Do not believe all the stories you hear about Professor Wenzel. Even after he has bought an automobile, he may still sell you.
3. Remember! If your eyeglasses are not properly adjusted, or if you miss the first chapter of Thillips, they will be remade.
4. Anyone approaching you selling passes to ride the Bouliding (Continued on Page 3)

Unique Advisor
Program Aims At Class Unity

Juniors Will Serve As
Orientation Councillors For Entering

Publishing a long desired need in our attitude committee, in cooperation with the Junior Class, we present a program designed to provide an avenue of approach to members of the freshman class. One of the primary objectives of this orientation will be to provide an atmosphere of friendliness toward freshmen, which will be thoroughly explained to them by a member of the faculty and the adviser who will be the student to a competent authority. In this way a new student will receive the direct help and advice of either the upper class, or experience at Technology.

No matter how many mat- ters pertaining to the preliminary difficulties encountered during the first year there are bound to be kind answers by a member of the faculty and the advisor who are the students to a competent authority. In this way a new student will receive the direct help and advice of either the upper classmen, or experience at Technology.

The class of '53, in the eyes of the register, is the first class for about seven years to be stabilized by pre- year enrollment (700). It's average age will be (19) a student seventeen or eighteen. All of which will be considered as a necessary step to give some fatherly, or at least big-brotherly advice to your younger brethren. Hurry up...!

One Wing Occupied
In Hayden Library

Nov. 1 Tentative Date

Staff members of three Institute departments will be present for the first time at Hayden Library, where several special programs will be held.

The Tech 'To Carry
Calendar of Events

Beginning in the Tuesday, September 27, the next article in the Tech, the Calendar of Events will be published every Wednesday throughout the school term. All events appearing in the Calenda are sponsored by the News Service Room, Room 310, City Hall, and will be published on the preceding Thursday.

Tours, Addresses Mark New
Freshman Weekend Program

This year's Freshman Camp, slightly different than the camp of previous years, is an attempt to bring the faculty and upperclassmen to introduce freshmen to the Institute. The program includes academic, extracurricular, and social activities.

The Tech Invites '53 to Smoker

Are you looking for an easy way to make friends around the Institute? Are you thinking of ways to spend your time after school hours? Then watch for The Tech's Freshman Smoker. You are invited to come to Tyler Lounge on the second floor of Walker Memorial (Thursday, September 29, at 8:30 p.m. and meet our student leaders.

If you look at our masthead, page 2, you will see that we have several features on the Tech. For those interested in writing there are news, magazine articles, and sports positions open. On the other hand, those interested in advertising, circulation, or other activities may find the opportunities are public office, and the sports teams are open to both.

Meet our staff and our special speaker September 29. Or come to our office, third floor of Walker Memorial, any Wednesday evening at 8:30 p.m.
