Pandit J. Nehru
ToVisit Technology During Tour of U.S.

The Honorable Pandit Jawaharlal Nehru, who will visit Technology on Friday afternoon, October 21, Mr. Nehru will be the guest of honor at a reception and dinner at the home of President Kiliman to which members of the Indian Students’ Association of Greater Boston will be invited.

The Prime Minister’s official party will include his sister, Her Excellency, Mrs. Vinoo Laxmii Pandit, Indian Ambassador to the United States; his daughter, Mrs. Indira Gandhi; Sir Ogra S. Bappu, Foreign Minister of India, and a number of military aides.

Members of the Institute’s administrative staff and faculty who will meet Mr. Nehru will include Dr. Julius A. Stratton, Provost, and Mrs. Stratton; Dean Baer and Mr. Baker; Professor Paul M. Chalmers, Administrators for Postgraduate Study, and Mrs. Chalmers; and Professor B. Aidan Treherne, Director of Admissions, and Mrs. Threherne.

Prime Minister Nehru will stay in this country about two months. The purpose of his visit is to make a goodwill tour of the United States and to study the educational system by visiting not only the Institute but other universities and similar institutions in this country as well.

During the visit of the Prime Minister he will be accompanied by members of the State Department’s Division of Security.

Dome Steps Are Revitalized
With Tons Of Copper And Lead

By PARKER GAY

Since the latter part of July, Technology students have been seeing an army of busy workmen on the west doors on Building 10, directly opposite Central Library. Last week the doors were moved, and it was revealed that the workmen were putting the final touches on their tools and descended, in answer to the query of those who saw them working. What were they doing, the workmen were very reluctant to say, but the evidence was clear. They were putting copper on the doors. The workmen were very professional and wouldn’t give them to me. However, they said that the doors would be better covered by copper, as it was more durable.

Lower Step Re-Covered

The thirty-three-year-old dome has been completely covered with copper, and the workmen have done a very good job. The dome is now fully covered, and the workmen are very pleased with their work. The dome is now quite shiny and bright, and the workmen are very proud of their work.

Westgate Now Open
To Staff Members

Limited hour in the recent past has been offered to at least a few persons connected with the Institute by way of a change in the policy regarding the allotment of appointments. This change has been effective from a recent date to the present. The Dean’s office has declared that no more than five per cent of any appointments that might be available at Westgate are to be reserved for appointments.

This group is to include only marred members of the instructing staff, that is, the group of people who are definitely in extreme need of housing. The Dean’s office stated that since the general need for housing is so great and the list of applicants so long there will actually be little change in the current situation.

The new policy at Westgate follows closely that of Westgate West, which, since it was turned over to the Institute by the federal government, has been administered through a similar plan. When Westgate West was turned over to the Institute, the federal government stipulated that five per cent of the homes were to be reserved for those marred instructors who were absolutely needed for the teaching of veterans.

Because of the increased strain on housing facilities, the Administration feels that it is advisable to use the same plan in regard to Westgate.
