Eighteen NSA Summer Jobs Open in European Cities

Want to spend the summer in France? Holland? Belgium? The National Student Association has available eighteen industrial jobs in European countries. Twenty students have already been placed in such positions as drafting, construction work, and more highly technical fields. Jobs offered include the following: building of railway stations in Holland, architecture offered in work in machine shop for an engine manufacturer, and power station work for an electrical engineer in Finland. Work in the mineral industries in Norway, being a geologist or mining engineer; and work in a railroad bureau in Sweden, electrical engineer required. The stipulation is that students must be juniors or seniors.

Savannah Symphony

There are no language requirements, whatsoever, in any country, except France. The jobs last for a period of not less than eight weeks after which students are free to travel and spend their time as they wish, with travel and subsistence wages being paid. Lodging will be found by the host group but must be paid for by the student in all except a few cases where it is provided free by the companies.

Cost of transportation to and from Europe is met by the individual. Round trip passage from New York to Rotterdam has been arranged for on a student rate. The boat leaves June 26th, and docks in Rotterdam July 5th. It returns from Rotterdam July 26th.

Travel by Air

A plane will be chartered if there are enough who desire fast transpor- nation and an extra four or five will be added. The plane will leave Rotterdam July 5th, and docks in Paris July 11th and will leave Paris July 14th.

With the rank of Junior Mug Lift Committee is William H. Shenkle. Ee
