UNDERGRADUATE PROFESSIONAL EDUCATION

There is one basically confused issue at the root of the present controversy concerning the proposed changes in the undergraduate educational program at the Institute. Whenever anyone states the purpose of undergraduate education, it is immediately subject to widely divergent interpretations. It is important to realize that the Institute is a place designed to prepare men for the three major categories outlined above there are separate educational requirements. Most, it is impossible to divide engineering students into the three major categories into which its students will essentially fall.

In any consideration of the entire undergraduate educational program it is necessary to bear in mind three factors. First, for each of the three major educational categories outlined above there are separate educational requirements. Secondly, it is impossible to divide engineering students into the three major categories into which its students will essentially fall.

In any consideration of the entire undergraduate educational program it is necessary to bear in mind three factors. First, for each of the three major educational categories outlined above there are separate educational requirements. Secondly, it is impossible to divide engineering students into the three major categories into which its students will essentially fall.

In any consideration of the entire undergraduate educational program it is necessary to bear in mind three factors. First, for each of the three major educational categories outlined above there are separate educational requirements. Secondly, it is impossible to divide engineering students into the three major categories into which its students will essentially fall.

In any consideration of the entire undergraduate educational program it is necessary to bear in mind three factors. First, for each of the three major educational categories outlined above there are separate educational requirements. Secondly, it is impossible to divide engineering students into the three major categories into which its students will essentially fall.

In any consideration of the entire undergraduate educational program it is necessary to bear in mind three factors.
