**Control Of Korea Is Key To Control Of North Asia**

by PROFESSOR H. D. MAHONEY

Department of History

Fifteen notes - This is the first of a series of articles describing Korea and the part it plays in the world scene. Dr. Mahoney is Professor of History at the Massachusetts Institute of Technology. His recent work on the subject of Korea was published as "Korea as a First in the Far East: The Principal View."(Continued on Page 2)

**Draft Picture Will Not Affect Job Prospects**

Sage Tells Candidates Percentage Placement Should Continue High

"Personal directors and employment managers are willing to take February and June graduates in spite of the draft," stated Nathaniel M. Atlee, Placement Director, in a recent lecture to the frosh. In summing up the past year's placement picture, Mr. Sage said that as of October 29, 1955, 70 per cent of men receiving B.S. degrees had been placed, 16 per cent of those receiving B.S.'s, 100 per cent of men receiving the professional degree, and 96 per cent of men receiving doctor's degree.

**Job Search**

Salary ranges which job hunting graduates might expect were also outlined. For holders of Bachelors' degrees the range was $250 to $350 per month with chemical engineers getting as high as $310 per month. For engineering graduates, the range of salaries expected was $250 to $450 per month more and men with doctorates from $350 to $500 per month.

**T.C.A. Serves For 40 Years**

Organization Boasts Of Numerous Activities

"T.C.A. was born in a copy of THE TECH of some twenty-odd years ago probably was a cause of several raised eyebrows, but the organization managed to survive the blow in spite of the fact that its chief executive seems to have graduated a Wellesley beauty and a New York job offer (both secured through the T.C.A.) to the rigors of Institute life. The Technology Christian Association is one of the oldest of Institute societies, having been founded in 1888 as the Technology Y.M.C.A. and bearing its name from that present.

**Sogs Takse Grid Some**

The Sogs did salvage one part of the day, however, and that was a first in the freestyle relay and a second place finish in the football game in which both classes were leading by a 9-7 score. They picked up their 13 points with two straight pulls. This event added three points to the Field Day winners score. A win for either class in the glove fight would have given them a victory in the Field Day and after the dust and debris was clear, it was found that the frosh had managed to extract 90.2 gloves from the Sogs while only giving up 74.9 hand coverings. The five points awarded for this event went to the frosh and along with Field Day. The class of '54 will no longer be required to wear their frosh ties as a result of their victory.

---

**Photo by Armstrong**

A view of the victorious freshman team on its way to national victory over the heavily favored sophomore team, which some benevolent soul had managed to extract 90.2 gloves from the Sogs while only giving up 74.9 hand coverings. The five points awarded for this event went to the frosh and along with Field Day. The class of '54 will no longer be required to wear their frosh ties as a result of their victory.
