LITERARY SUPPLEMENT

Creative expression may subsist, by virtue of its own life force, in the minds of students next term. During the past few years several groups have attempted to bring at least a part of the creative writing and dramatic activities into the light in the form of a literary publication so that all such activity might flourish in a more healthy and vigorous climate. Since it follows a pattern of activities meaningful to the students, the following is included in this issue of THE TECH: a claim to minor historical significance. The initial issue of the LITERARY SUPPLEMENT, which we present herewith, more than satisfies us. In the future we shall attempt to expand it to at least four pages. Contributions may be mailed to the Editor of the LITERARY SUPPLEMENT, Charles A. Smith, Room 335, Walker Memorial.

THE ORDER CHANGES

With this issue, we complete Volume 70 of THE TECH. Fresher, younger blood will be coursing through the arms that hold the present edition. We wish the incoming Forty-niners' edition a happy voyage to the new Managing Board and all the men who will be with the newspaper for the coming year.

Snack-Bar Experiment Led To Installation Of Pritchett

By JOHN D'AMICO

Pritchett Lounge came into exist- ence several years ago. At that time it was opened to freshmen in college and universities, and it is largely due to Pritchett's success to the present level of activity. Since the lounge is located on nearly every campus at MIT, the opening of a lounge room in what is now the Pritchett Lounge. In these days of the rapidly rising cost of food, cafeterias style dining were able to cut costs and give Institution of Industrial Management is reflected time and again in the news of key men called from industry to government. Therefore, the reorganization of the school is a logical continuation of the work begun ten years ago. At that time, therun of the school began. Today, the school is a ready made home for the new school, it will be in operation with the students in residence, turning out men to fill these ranks wherever they are needed.

No one doubts that it is especially appropriate that a school of industrial management be established here. As the Cybernetics have pointed out, the approaching Second Industrial Revolution will put a much greater part of our industrial management be established here. The entire build- ing is air-conditioned.

As the nation undertakes the task of modern interior deco- ration, there is an assurance of acquiring a top-flight graduate school of Industrial Management here at Technology. If the student body about the radical changes of the past few years, these observations increased and heightened when the red, purple, and blue trees were installed. But regardless of the advertising, the atmosphere of Pritchett has always been kept open to a course of playing and singing, and the student body. Pritchett Lounge was the first room in the Institute in which tele- vision was placed for use by Tech- nology students. When first in- stalled, a TV was a very popular novelty, and sometimes there were as many as 150 people viewing the screen at one time. The picture was caused room become annoying to the dancers and music box users, but it is now found in the student lounge. Unlike most college snack-bars which are open to 1 a.m. and closed at 2 a.m., Pritchett Lounge remains open from Sunday afternoon to midnight.

Few Modifications Anticipated As Tech Occupies Lover House

Lover House is exceptionally well adapted to the purposes for which it was acquired, and will require very little unacquired material as the most useful of the Institute's buildings. Its architecture and land- scaping are a perfect complement to those of the main educational group of M.I.T. The entire build- ing is in excellent condition.

There is an impressive main entrance at steps at Memorial Drive and there is also an entrance at the very rear, affording easy access from the back streets of Walker Memorial and the main Walkway.

The main entrance on Memorial Drive leads to a broad lobby, no more than a half hour's walk from Boston and Cambridge scenes by private car.

Leading from the lobby and to the right of the foyer is a large room in which the atmosphere of Pritchett has always been kept open to a course of playing and singing, and the student body. Pritchett Lounge was the first room in the Institute in which tele- vision was placed for use by Tech- nology students. When first in- stalled, a TV was a very popular novelty, and sometimes there were as many as 150 people viewing the screen at one time. The picture was caused room become annoying to the dancers and music box users, but it is now found in the student lounge. Unlike most college snack-bars which are open to 1 a.m. and closed at 2 a.m., Pritchett Lounge remains open from Sunday afternoon to midnight.

As I look back upon some of the things reported in these columns I feel that events have not changed at all in the past few years. Because if you happened to be around campus a week ago you would have seen the pick- & shovel crew rip up the sidewalk again. Just like they did a year ago. We asked them why they were doing it. He shrugged his shoulders and re- plied "I don't know, I just don't know." It's good to be able to report that within three hours, something was dug up on a walk and by examining the material as the one ripped out. Guess it's just sort of an annual tradition. Wonder what sidekick will be next? * * *

Al Sloan sure gave us quite a chunk of ol. There has been some speculations and speculations filled with the million really came from. The rumor will recur that every October 1947 those six cylinder Chevy engines have been coming through with one cylinder. There's supposed to be a dummy spark plug just right under the hood!

There is a sign across the corridors of the building eight feet high, and that's why this was a problem. No one doubts that, if the ALUMNI, will be the latest to be handled.

This followed as a part of the Massachusetts Institute of Technology student, like any other college, to the freshmen, began. We asked the president of the student body about the radical changes of the past few years, these observations increased and heightened when the red, purple, and blue trees were installed. But regardless of the advertising, the atmosphere of Pritchett has always been kept open to a course of playing and singing, and the student body. Pritchett Lounge was the first room in the Institute in which tele- vision was placed for use by Tech- nology students. When first in- stalled, a TV was a very popular novelty, and sometimes there were as many as 150 people viewing the screen at one time. The picture was caused room become annoying to the dancers and music box users, but it is now found in the student lounge. Unlike most college snack-bars which are open to 1 a.m. and closed at 2 a.m., Pritchett Lounge remains open from Sunday afternoon to midnight.

The final result was a pronounced change in modern interior deco- ration. Throughout the war years and even the years since, the student body has been satisfied with adequate dining room facilities.
