Contract Feeding Poll

95,000 Pounds Per Hour
Added To Boiler Capacity

Dormitory Doings

Inclusive Ballot Misunderstood;
Nays Seem to Have It

Bibliography

Preliminary results indicate that less than sixty per cent of the students returning ballots in the Dormitory Committee's Poll on Contract Feeding in Walker Memorial Dining Halls are favoring the program as outlined in a summary accompanying the ballot.

Because it was felt that information of sufficient accuracy and pertinence was not provided with the last ballot, the results of the poll will not be considered conclusive.

At the present time the committee is planning another poll.

Mr. Frank Baldwin, stated that the program might be introduced for as few as 400 students.

Section Clarified

Commenting on the apparently confusing statement of the Dormitory Committee President Donald Bohmich '61 said that several misconceptions in the summary which was circulated were misinterpreted by students. Bohmich indicated that the ballot had been misunderstood since "...a number of differences certain foods are acceptable to various students... there is a solution to this that will be unable to be reached because of circumstances."
