Course XX-B Lists Option Engineering

The course will be designed to provide background in the pharmaceutical, biological, and food fermentation industries. Since the advent of "new drug design," the pharmaceutical industry has evolved in such a way that chemical engineers for students with a basic background in biology, microbiology, and mathematics are required. This program is aimed at providing students with all the needs.

Service Official Clarifies Decree On Deferments

Clarifying recent orders which provide for a postponement of mid-term and college graduation for those who meet the criteria for occupational deferment, the official explained that it is possible for students to see that their record is in order by completing the application and submitting it to their local board, which will, if it considers them as forming part of the defense program, turn over their files to the Department of Defense. There are three main criteria which determine whether a student will be of importance to the development of the local board, which will, if it considers them as forming part of the defense program, turn over their files to the Department of Defense.

Logarithms Add Stimulants To Repertoire of Novelties and Barbershop Favorites

The Logarithms, a student a cappella group, is one of the many novelties which has been adopted by the student body. In the past, the Logarithms have been associated with the upper classes and with the social clubs, but now they are being added to their "bag of tricks" with the aim of attracting new members.

D.C.'s Exercises Control Over Sponsored Research

Most of us have heard of D.C., though not many know it well. The letters stand for "Division of Industrial Cooperation," while D.I.C. refers to the function probably unknown to a good many more.

The Department of the Institute whose function is to exercise administrative control over any Institute-sponsored activities, is made up of three main groups: (a) the president, who is the head of the department; (b) the executive committee, consisting of the president and two other members of the administration; and (c) the office of the institute, consisting of the president and a secretary.

The three main criteria which determine whether a student will be of importance to the development of the local board, which will, if it considers them as forming part of the defense program, turn over their files to the Department of Defense.
