I; it two of our Tech athletic teams were really strong it could be that Tech might have a strong leadership or the like. I don't know. But what we have learned at the Institute is that the athletic department deserves a load of credit for the job they have been doing.

The Intramural council should - and must find a solution soon. We were sorry to hear that the Intramural council sidestepped the athletic problem Tuesday night. The Intramural situation is certainly a fund raiser for the Institute, and it was a plan that was fine. We hope that the Intramural council will find a solution soon.

The general conclusion to be drawn is that Techmen (63% of the student body) certainly do not have the same athletic interest. Friday, March 16, 1951

---

The rugby team is traveling to Bermuda this spring to compete in an international rugby tournament. The team is primarily composed of graduate students. The MITAA will not pay their expenses. The fencing team will show their stuff in the intercollegiates this weekend. Good luck and bring home the bacon.

The Intramural council adds table tennis

At the latest meeting of the Intramural council held last Tuesday afternoon, it was decided to place table tennis on the list of Intramural sports and bowling was listed as another possibility.

It is hoped that these additions will be approved and added to the list of sports for organized athletics besides getting a more representative cross section of athletic interests here at M.I.T.

The experimental system of having representatives from various living groups serving as officials for intramural sports was officially approved and the old method of having officials from the A.A.C.S. serve will no longer be used.

Vocational Medicine (Continued From Page 1)
crossed to five, an Industrial Hygiene, a Food Hygiene, an Industrial Hygiene, and a Doctors' Problems, and many others, those who are interested in this field. It is the Safety Engineer.

The Intramural council should and must find a solution soon.

The main concern for this terrible turmoil is the policy of the athletic department, which attempts to get the maximum number of students involved in the sports.

When some of your friends from other of the more athletically inclined colleges talk to you about Tech athletics maybe some of these figures will be of some use.

The athletic department deserves a load of credit for the job they do. They have even considered the fact that Techmen are hesitant to join a team where they can't do much better than play on 25+ teams. This is about 40% of the student body, which is a good record for any type of athletic competition.

Intergrocery sports has a total of 912 men participating in 329 freshman and varsity contests, representing the facts and figures. The general conclusion to be drawn is that a lot of Techmen (63% of the student body) certainly do not have the same athletic interest.
