Acquaintance Dance at Morses Hall This Friday

Girls—430 of them—and many of them eager to meet George M. Schuyler, chairman of the dance committee, will be featured at the annual All-Technology Academic Dance this coming Friday, September 23. The dance is sponsored by the Cadet Club, and all of the girls who have been invited.

Traditionally one of the most successful of the academic dances, this year's party promises to be one of the best yet, according to John Welch, chairman of the Dance Committee. Technology students will be matched with those at the girls' schools to assure a female-balanced selection. This dance year will be the first of the season in Morses Hall.

Refreshments will be served during most of the evening. Entertainment will be provided by Ed Kewin and his orchestra, and boisterous doorway chatter from the Institute will make the strains around, and immediately in the street area.

The magazine says of Bunker, who is a special advisor to the government on medical use of atomic energy, that "he has been a rallying force for Civilian Conservation Corps workers, and that is his hobby is photographing birds.

In one of the more luxurious suites is a living room, which is the home of the faculty acres high. This room is furnished so magnificently that is available in a few graduate students, and is perhaps the most comfortable and the best in which one can live. The room is furnished with an excellent collection of books, and has a painting of the famous model of the Cleveland Museum of Natural History.

At the first Graduate School Convocation held in Friday, Dr. John Welch, chairman of the Graduate School, summarised the present status of the graduate program for the students of the Graduate School. This policy is based on a review of the program and the special policies issued by National Headquarters, Releva-

Chairman Bunker says that the latest bulletin reads in part: "...an education of full-time graduate students..."

"The above definition should not include students who are primarily as teachers or research workers who may at the same time be engaged in a few graduate students, if the degree is not more than two years. The few graduate students who are not engaged in graduate study beyond the bachelor's degree..."

Although, the bulletin adds, "...the above definition should not include students who are primarily as teachers or research workers who may at the same time be engaged in a few graduate students, if the degree is not more than two years. The few graduate students who are not engaged in graduate study beyond the bachelor's degree..."

British Professor Discusses Molecules

"Theories of Molecular Structure will be the subject of a talk to be given by Sir John Lennard-Jones, Professor of Physical Chemistry in the University of Cambridge, England, at a special staff seminar of the Department of Chemistry next Monday afternoon at 4:15 p.m., in room 6-130.

A Fellow of the Royal Society and an authority on the theory of molecular structure, Sir John Lennard-Jones is also well known for his contributions to the theories of intermolecular forces and of the structure of crystals and liquids.

In view of Sir John's eminence as a scientist, all interested are invited to attend.

Refunds of 10% On Cash Purchases

Patronage Refunds to be distributed on or after October 15 by the Harvard Cooperative Society for the fiscal year ended June 30, 1951, will be the greatest ever paid by the Society. A total of $107,609,000 was reported for the fiscal year, an increase of $27,352,000 over the fiscal year 1950, and $13,000 over the total cash sales for the Society for the year.

President Cole stated that this year 1947-48 was the most successful year in the history of the Cooperative. "The minimum of ten percent on cash purchases has made it possible for the increases in patronage refunds to be distributed on or after October 15 by the Cooperative."

There will be a checking of accounts in the coming weeks, and it is anticipated that the accounts will be completed soon. It is hoped that the accounts will be completed so that the work will be brought to a conclusion.

The cost of the remodeling of Walker Memorial includes the complete redecoration of the dining hall and the remodeling of the lounge. All the chairs in the dining room will be replaced, and all the tables will be replaced. The walls will be remodeled, and the fireproofing will be done. The ability of further changes in the dining hall will be greatly increased.

The Graduate House will be remodeled, and permanent racks for books and other supplies will be placed in the serving room. The serving room will be cut down, and a new frame will be installed in the old room. A new frame will be installed in the old room.

The board of telephone switchboard is still in the middle of a major remodeling project, and will cost $19 so that there will be more room for the new frame. Plans will be made to call for a new lights, rugs, and furniture in the same style as the new frame. The old frame, also designed by Professor Beckwith.

Work on the Graduate House will be started next summer, and will be completed by the end of the following summer.

Fullbright Group Makes Two Additional Awards To Technology Students

The Institute's Fulbright Committee has received three applications for the award of scholarships for foreign study to two Technology students.

Edgerton's Stroboscope

By ED EIGEL

In his more serious moments, Dr. Harold Edgerton of Technology is a man of science. He is also a man of leisure, and his hobby is photographing birds.

In one of the more luxurious suites is a living room, which is the home of the faculty acres high. This room is furnished so magnificently that it is available in a few graduate students, and is perhaps the most comfortable and the best in which one can live.
