Sympathizers To Rally Around Struik’s Defense

Committee Again Denies Recent Charges; Enlists Financial Aid

A defense committee has been set up by friends and sympathizers of Struik in order to raise money for his defense. The committee is headed by Dr. W. H. Struik, new suspended law professor, who is on trial for allegedly violating the university’s regulations concerning the use of the mails. The committee has been formed to help Struik in his legal defense, and it is anticipated that the money raised will be used to pay for his legal expenses.

Gabo Constructions Are On Display At Hayden Library

A retrospective exhibition of sculptures by Naum Gabo is now on display in the new gallery in Hayden Library. Known as "Linear Construction in Space," the sculptures have a modernist character. The works may be seen daily from 9 a.m. to 5 p.m., Monday through Friday, until November 24.

Potential Buck Rogers’ Swoop Through Futuristic Escapes

By ED RIGELL

Technology is a fairly well-known subject in the United States, and throughout the world for that matter. It has put us even more in the public eye with the rise of national newspapers and local newspapers.

Everyone has probably read the article in today’s Evening Telegram on the last famous Buck Rogers’ escape. It was described as a story about the "brightness and superlative," but not all of it was fully understood.

The Buck Rogers’ escape seemed to be. "Is that all?" asked one of the several "boys," apparently in the same article, decided to show the world in general, and Brooks in particular, that the Buck Rogers was not a fictional character. He pointed out that the Buck Rogers was a notable character in the escape.

The escape was a fantastic adventure

West Flag Pole Must Come Down

The west flagpole in the Great Court has been replaced. Only those ties have been added as a security measure in case the pole will be climbed.

Men from the Atlantic Flag Pole Company examined the west pole last week and are now putting up the new pole. They built a scaffold around the 100-foot pole, took off the ball top and saved off a three-foot section. This section was found to be rotten. This type of pole was condemned, and the fate of the east pole is as yet unexplained.

Poison was left at the base, (Continued on Page 4)

Late Story: Red Feather

To Get Some TCA Funds

Ten percent of all funds collected in its forthcoming fund drive will be turned over to the Red Feather Campaign, the TCA announced last night. At the same time, the TCA issued a statement that its executive board has decided to give funds to the Red Feather Campaign.

Freshmen Forfeit Entire Term Rent

If They Move Out

By HUGH GALLAGHER

All freshmen moving out of the dormitories for any reason other than financial necessity will forfeit their entire term rent, according to an announcement made at the last Inter-Fraternity Council meeting.

This action will continue to be subject to the twenty-five dollar fine and will be returned to those freshmen who have paid the fine and room rent.

Laundromats move within the dormitories are subject to a ten-dollar charge, unless their too is to the advantage of the dormitory.

New Policy

Last year, freshmen were only subject to the twenty-five dollar fine. But at the end of the Spring term, before the arrival of the new Dean of Residence, R. Francis Bevolden, a new policy was decided upon.

Freshmen are allowed a week after registration day to pledge a fraternity, and if after this time, they must remain in the dormitory all semester.

Dean Bevolden, when interviewed by the Tech, stated that the whole problem of required freshmen resi-

dence on campus and deferred all peculiar remain must be put up to a complete re-examination; that it must be studied from a sane and sensible point of view.

For Further Information

Before making any decision, the Dean plans to hear the opinions of all possible concerned. He says, "There will be no snap decision."

The Fraternity has played a vital and important part in the life of the institute, their welfare must be considered."

NOTICES

East Campus Reception

On Wednesday evening, October 25, between the hours of 8:30 p.m. and 10:30 p.m., Burton Room will be open to the public for the reception of two new faculty members, Professor Powell and his assistant Ken Gordon.

Paul Powell wishes to meet all the East Campus residents and introduce himself with their problems and con-

bertrand russell speaks of mankind and politics

l.s.c. presents lecture by british philosopher in 10-250 on friday

by gordon edlin

bertrand russell, one of the world's most extravagant individualists, has left little territory untried by his peering intellect. Blasting out with an avid enthusiasm for mathematics, Russell soon discovered that only the most abstract of the sciences agreed with him. The proof of his attempt to destroy the whole of mathematics was the first volume of "Principia Mathematica," which appeared in 1910, and which has since developed into the science of mathematics. In the years that followed Russell expanded his genius into the fields of education, social sciences, and morals.

Russell has never compromised his beliefs with necessity and as a result he has always related to his personal criticism of patient and sometimes humorous insight. Having always been a profound advo-

coupe of individualism and free expression, he has frequently warned against the dangers of theocracy, the government of the Common-
