Russell Discusses British Elections, Foreign Policy

By MUSH GALAGHAR

Before giving his LCR lecture in the Student Union yesterday, Sir Henry Thomas Tizard, former director of the Royal Aircraft Establishment, gave a seminar in the Emma Rogers Room. In his speech, he discussed the role of engineers in the British government's security policy.

Sir Henry Thomas Tizard has written extensively on the subject of science and democracy. He has been a strong advocate of the need for engineers to play an active role in government policy.

Boston Stein Club Presents Prize Fund To Dr. K. T. Compton

A fund, the income from which will be used for prizes for students of great promise, has been presented to Dr. K. T. Compton, chairman of the Department of Chemistry, by the Boston Stein Club. The fund, to be known as the Karl Taylor Fund, will be awarded to students in the field of chemistry.

Science & Democracy in its Political Topic

The sixth annual Arthur Dehon Little Memorial Lecture will be given by Sir Henry Thomas Tizard, former director of the Royal Aircraft Establishment, and an unparalleled specialist in aeronautical engineering. The lecture will be held at 8:30 p.m. on November 5.

Nobel Prize Winner Speaks On "Human Nature And Politics"

"If politics is to be scientific it must be based upon the science of human nature," said Sir Henry Thomas Tizard at the lecture. He added that the science of human nature is not yet developed enough to be useful in politics.

"The alternative is to let the Russians have the oil fields of Iran. The Middle East." The U.S. and the Atlantic Pact nations must take action to prevent this from happening.

The President's Report - page 3

The U.S. Army has been working on the development of new weapons systems. The Army is looking for engineers who are interested in working on these systems.

Compton States Engineers Need Will Be Greater

Manpower Policies Must Deal Firmly With Issue Says Corporation Head

"The number of graduates in the next few years will be far short of the need for new engineers," said Dr. K. T. Compton, chairman of the Institute of Electrical Engineers, at a recent meeting of the American Institute of Electrical Engineers.

The British put on a display of force at the recent meeting of the Institute of Electrical Engineers. The British engineers showed their ability to design and build advanced electrical systems.

The love of excitement is another of man's desires, said Dr. Russell. He added that the love of excitement is important to the British, as it is to the Americans.

PLACEMENT BUREAU INTERVIEWS

OFFICIALS Of the Official Placement Bureau report that recruiting for February graduates continues to be successful. Placement offices have been able to fill nearly all positions within the month of December. It is predicted that all February graduates will take advantage of these employment opportunities.
