ALONG THE ROAD TO TOTALITARIANISM

The so-called "red" teacher bills are perilously close to becoming part of the law of the Commonwealth of Massachusetts. They are one segment of a great state of anti-Communist legislation with which the majority of the state legislature, motivated largely by fear and ignorance, hopes to save the state from communism.

Specifically, the McCarran-Dorgan education bill would make college presidents personally liable for "any professor teaching the overthrow of the government" on his faculty. Staff fines would be imposed on those presidents who did not immediately discharge an instructor under suspicion. Thus, the principle laid down by the Institute in 1949 that it could not be responsible for the opinions held by its professors outside the classroom would be completely subverted and the Institute would become judge of the guilt or innocence of one group of citizens. Needless to say, what the Institute considers subversive would probably not agree with the views of Monsen, McCarthy and Dorgan.

All students should take whatever action possible to discourage passage of these bills. Citizens of the Commonwealth especially should make themselves heard through their representatives at the state house where clear thinking is apparent at a premium.

REPRESENTATION IN STUDENT GOVERNMENT

The Student Government Investigating Committee now has before it a series of outlines detailing proposed reorganizations of the present Institute Committee set up. The plan submitted by the committee has resulted from moderate to radical changes of the status quo. S.G.I.C. has a tough job on its hands in working out a workable form from such divergent proposals. It must decide at the outset whether the top deliberative body in the reorganized structure is to be a large, directly elected group or a small group chosen by selective filtering of student activity leaders. There are two reasons why the Committee should decide on the former arrangement.

First, the type of business considered by this group will not be simple. Policy questions of grave importance and complexity will arise. Even in the case of committees constituted specifically to advise the administration, there are difficulties to be overcome if it is to be a large, directly elected group or a small group chosen by selective filtering of student activity leaders. There are two reasons why the Committee should consider the former arrangement.

Second, the type of business considered by the group will
