Iested are urged to attend. All those interested are urged to attend.

There is ample opportunity for students who want to work on movie projection, speaker arrangements, or publicity. Each student should be represented on the assembly. It would be folly to try to evaluate the relative interest or contributions of the three living groups in student affairs. An equal number from each is the only sensible solution.

Whatever the details of representation finally agreed upon, the major task of the S.G.I.C. is to see that the student is represented.

Past experience shows conclusively that when questions bearing directly on his studies and living are involved, the student will take an active interest in their discussion and resolution. Not only will be participate in student government with the functions and structure outlined above; he will demand that it be set up.

Tech Wrestling Rally

To Be Held Today;
Buckstaff Captain

Today at 5 o'clock p.m. in Room 1-256 the varsity wrestling team will hold its first rally of the season. Varsity Coach Roy Merritt has requested that all members of last year's freshman and varsity teams turn out for the rally and also any other men who are interested in trying out for the varsity squad.

All reasonable estimates of this year's varsity squad's strength place it potentially as one of the most powerful teams in New England. Captained by Sinclair Buckstaff and consisting of such individuals as Chuck Buckingham, who are undefeated in college wrestling, John Hansen, who returns to the squad after a year's absence in the service and others, have distinguished themselves here at Tech, this team may finally bring recognition to Tech in the field of wrestling.

Much of the success of this year's team will depend upon the spirit of the squad. Friday's rally will show us what we can expect in the way of spirit from the squad. Another important factor will be the depth of the squad. The wrestling teams of past years have been so shallow as to cause forfeits when injuries occurred to any of the first string squad. This is another important reason for having a large turnout 

Technology's rughy team which recently triumphed over Harvard a week ago before a record crowd went on to eke out a draw with Princeton last weekend. Princeton University has one of the strongest teams in the East this year and will most probably be favorites to win the Bermuda tournament. The Tech team played exceptionally well against a very strong club.

The Beaver's next game will be against McGill University on Friday, at 3:30 p.m. The Tech squad lost last month in Montreal and were beaten by superior backfield play. However, judging from their showing during their last two games the Beavers may finally bring recognition to Tech in the field of wrestling.

Hydrodynamics

was the only available plot on Institute grounds which would afford these advantages.

Rooms for research in the Laboratory are planned for a maximum of useful floor space with a minimum of 10 feet square per person. The most elaborate built-in feature in the central pumping system with circulation throughout the entire building provided by large water storage tanks. This enables research projects to be constructed in almost any desired position. A large rectangular loop of galvanized steel pipe 18 inches in diameter was constructed to bring the maximum flow of 35,000 gallons per minute from the circulating pumps as near as possible to any portion of the main hall, where much research will be done.

Ship Model Towing Tank

In the basement is a new Ship Model Towing Tank which will be used by the Department of Naval Architecture and Marine Engineering for research and instruction in the hydrodynamics of ship design. Ship-model tests are extremely useful in computing the relative performance and efficiency of various designs. The tank is 108 feet long, 8 feet, 7 inches wide and 6 feet deep, a size that permits effective use of models up to six feet long. The method used for measuring towing force on models assumes precision of measurement to within 0.0001 pound. Obviously, this new Towing Tank will advance MIT's quality of research in the field of designing ships.

A hydrodynamics laboratory almost as extensive as this one have ever been built in the United States. Construction of this laboratory brings to the Beavers probably the best research center in hydrodynamics on the east coast.

Beaver Rugby Squad

Ties Princeton, Play McGill Unit, Today

Basketball Rally

There will be a freshmen basketball rally Monday at 5 o'clock p.m. in the 3-13 Club Room in Walker Memorial. All freshmen who are interested in playing on the freshmen squad are urged to attend this rally.

Throw Away Nicotine

Get Medico Crests, $3.00

Get Medico Medalist, $1.50

Get Medico Pipes at $1.25

Get Medico Filter Holders for Free

Get Medico's Finest, Rich Burgundy

Sell and earn Medico's Finest. 

MEDICO FILTER PIPES

When filter runs dry, throw it away. 

Pipes or Cigarette Holders--throw it away, with the nicotine, juices, flakes and tar. Next filter has been treated to eliminate smoking. Imported Briar.

Medico Finest Club Award Backflow Filter

MONTREAL TO BOSTON

MEDICO CREST--$3.00

MEDICO V.F.--$1.50

MEDICO MEDALIST--$1.50

MEDICO FILTER PIPES--$1.25

With or without filter
