Dancing and New Facilities

By ELEN DIBA

Interested in starting statistics? Here are the little known facts about the first dancing and new facilities at M.I.T.

Everything at Walker is necessarily done on a large scale, with many persons on the student staff and so many activities taking place simultaneously that it is impossible to attend to the details of the safety policy of the faculty and staff. Besides serving meals to Tech students and staff, Walker Dining Services also provides a catering service to the students and faculty. The exhibit is under the supervision of Dr. Hallberg, and the faculty and students are free to come and go as they please.

The Dining Hall is run on a non-profit basis, and the problem of a tremendous overhead is solved by the faculty and students, all of whom are volunteers. In addition, there are the salaries of the staff members, both student and regular.

Walker Student Staff

The student staff, which was organized by William Carlisle, Assistant Manager, plays an important part in the efficient functioning of Walker. Students are well paid for their efforts receiving wages of ninety cents per hour. In all, there are nine semi-autonomous student staffs, composed of about 300 students. They are run similarly to the student government system here, with regular board meetings and a by-laws handbook by the Faculty.

SAFETY MEASURES AT ALUMNI POOL

With the recent accident death of a student in the Alumni Swimming Pool, attention has been focused on the safety measures that the pool provides. There are certain steps that should be taken as soon as possible to insure the maximum safety of swimmers. A life guard should be on duty at all times, preferably on a raised platform so that he can see the bottom of the pool. He should also have no administrative duties such as answering the telephone or making out reports. An adequate first aid kit should be on hand at the pool at all times.

We hope that the report approved by the Athletic Board last Wednesday night included these and other provisions. The Executive Committee of the Corporation should endorse these recommendations and therefore increase the security and safety measures at the pool to the practical limit.

Letters to the Editor

Editor, The Tech

Dear Sir:

I enjoyed reading your very interesting article in the November 3 number concerning General Biology, 7.06, and the new instructor assigned to the course. In need of correction, however, is the statement, "At present the lecture is given of the students are required to participate in the final plan for the course is completed. Most students are being asked if they are interested in participating until a final plan for the course is completed. Most students are participating in the course. They are required to participate in the final plan for the course is completed. Most students are participating in the course. They are required to participate in the final plan for the course is completed. Most students are participating in the course.

Dear Sir:

It was announced tonight that the Friday and Saturday following Thanksgiving are to be student holidays. For the students, this is a new experience. For M.I.T. Thanksgiving is now a two day holiday. The Institute has been rather obvious, but it is also an asset for encouraging students to remain on campus. It is also an asset for maintaining a better environment for the student and regular.

The most remarkable aspect of the Thanksgiving holiday is the fact that this year we will be homeward bound on November 21. This year we will be having our first Thanksgiving dinner here. The students and faculty are free to come and go as they please. The Institute has been rather obvious, but it is also an asset for encouraging students to remain on campus. It is also an asset for maintaining a better environment for the student and regular.

Dear Sir:

I was unaware of any plan to modify the course in this way.

Irwin W. Szer
