NOTICES

Catholic Club

Father Albert Low will address the weekly meeting of the Catholic Club tomorrow. His topic will be "The Mass in English, Demonstrated and Explained." The meeting will be in Room 2-190 at 5:00 p.m. Everyone is welcome.

Christmas Vacation

Airline representation, as well as representatives from the New York Central and New York, New Haven, and Hartford Railroads will be in the T.A.C. office until 5:00 p.m. today. They take reservations for travel accommodations for the holidays. Tickets will be delivered to your desk by noon.

Hill

The annual Hanukkah Festival of M.I.T. Hill will be held on Sunday, December 16, in the Library Lecture, third floor of Hayden Library starting 2:00 p.m. The program includes cultural entertainment, singing, social and Hassidic dancing. Girls' college members have been invited to join Hill. 

The annual Hanukkah Celebration of the Harvard-Stanford-M.I.T.-Leeds Foundation will be held at Agnes Hall, Radcliffe College, 13 Garden Street, Cambridge (Harvard Rd.), December 18, starting at 8 p.m. This combined event of the Cambridge and Harvard-Hill Foundations is a giant festival with students from all Boston Area Colleges attending. The program includes a presentation by the Hills Choral Group, which will be followed by dancing and refreshments.

Seniors

All seniors are requested to come to the Technique office, Walker, Room 311, to check their biographies for possible errors. This must be done this week, any day from 5:00 to 6:00 p.m. Technicue urges that this be done since no responsibility for errors can be taken by the Technique staff, unless each biography is checked.

Struik

(Continued from Page 1)

constitution has accordingly been drawn up.

Committee members regret that they may not attend this particular organization meeting. In their statement, they say that they take no stand on Struik's beliefs, but they uphold his right to have those beliefs.

They add that they in no way oppose his plans (one way or the other), but that they contest that interested students and faculty have the right to support Struik. The committee plans to raise funds for Struik's defense by means of contributions and, possibly, dances.

They plan to appear at the Wednesday meeting of the Institute Committee, if a review of their rebellion is considered.

Foreign Students

It is claimed that the committee has members with a variety of backgrounds; many are former students of Professor Struik. However, students present at the meeting are also forming a defense committee. It is not known at present how far they have succeeded.

Society Of Arts Features Popular Science Lectures

A winter series of four popular science lectures will be given at the Institute under the auspices of the Society of Arts at the Institute. The lectures will be given Sunday afternoons at 4:00 p.m. by members of the M.I.T. faculty on December 9, January 30, February 17, and March 17 in the Memorial Hall at the Institute. The first lecture was given last Sunday by Professor Hans Beavais, associate professor of psychology, "We Communication in Human Groups." The second lecture will be given January 29 by Professor Hans Beavais, associate professor of psychology, "We Communication in Human Groups." The second lecture will be given January 29 by Dr. Arthur T. Ryan, professor of hydrodynamics, on "Experimental Hydraulics in Engineering Design." Dr. Ryan will review experiments of hydrodynamists, hydraulic structures, hydraulic machinery and in many modern engineering processes. In order that Dr. Ryan's talk may be accompanied by demonstrations of modern research equipment in hydraulics, this lecture will be held in the new Hydromechanics Laboratory at the Institute instead of Huntington Hall.

Professor Beavais is a past chairman of the American Hydraulics Society and a past chairman of the American Society of Mechanical Engineers. He has been an associate professor of the Department of Civil Engineering since 1954, and is an assistant professor of the Department of Civil Engineering since 1954, and is a past chairman of the Department of Mechanical Engineering of the Institute.

permanent engineering literature. "Professor Den Hartog, who has been on the Institute staff since 1943, is an authority on mechanical vibrations. He has previously received a Richard J. Biondi Memorial Award from A.M.A.E. and is a past chairman of the Applied Mechanics Division of the Society.

Professor Robsonow

Professor Robsonow was awarded a Richard J. Biondi Memorial Award for "outstanding contributions in mechanical engineering within ten years of graduation." He was also selected for the Junior Award given the best paper presented before the Society by a junior member.

Art Exhibit

Greenewalt

(Continued from Page 1)

he says. "Certainly the desire for power, or the desire for prestige, or admiration, are not characteristic that would be expected to lead to the kind of competition we need in business management--the competence which creates a financially successful enterprise."

Taxes Passed On

Ordinary corporate taxes, as distinct from excess profits taxes, are almost entirely passed on to the consumer. Greenewalt says on that the fact that the huge volumes of money in today's business are being kept without hurting the ordinary consumer. "The net result of recent Federal tax policies is that we are much closer to a system of proportionate taxation. If you, will to, the old system of tithing, than we think. Whatever the percentage of national income taken in taxes, you may be sure that the ordinary citizen is himself paying, directly or indirectly, very close to that percentage. The figure would show that the number of those who pay more than the average are very few, and the aggregate amount they pay, in comparison with the total bill, is negligible."

Milling It

Greenewalt does not hold this policy against the government so much as the efforts to hide it. He does not believe the American people will tolerate what he calls spurious policies if they know the truth.

As argues that if the people are enlightened "they will realize first that weakening incentives hurts everyone, not just the more successful minority."
