Instcomm announces plan to solicit funds

The newly-formed Instcomm, which includes several Institute professors, has drawn up plans to send out letters soliciting funds. Professor W. Ambrose, one of the committee members, states that the first letters will probably go out to professors and other people who would be expected to take an intellectual interest in the case.

Three batches of letters are due to be sent out each week. Already, without having sent out any letters, Professor Ambrose claims they have received over $300 from people who have read of the committee in the newspapers.

Another regulation states that "persons who may be deferred shall remain liable for training and service in the Armed Forces until the thirty-fifth anniversary of the date of their birth." At the same time, however, there is a law prohibiting the induction of a registrant twenty-six years or over provided he continues to be engaged in activities essential to the national health, safety or interests or projects of direct national security. The provisions have received the necessary decision to be eligible for 3-A deferment.

Radioactive Pollution

a softening process were synthesized for the detailed study. On each type of water test, the removal of radioactive phosphorous by compaction was made by using a variety of turbidity and coagulant dosages.

Radioactive pollution is not only feasible but also economically sound.
