Tech Skaters Defeated; R.P.I. Inv. Tournament

On December 27-29 Technology went down to defeat in its second individual hockey matches at the RPI Invitational tournament. The teams participating were Brown, Loyola of Montreal, McGill, Babson, Canada, Harvard, Dartmouth, Williams, RPI, and Tech. The winner of the tournament was Brown, who defeated St. Patricks 6-2.

The Techmen upset their first duel against Loyola, who were last year's champions, with a score of 17 games with 17 wins. The expected score ranged in the two digit marks, but the Engineers only gave up 7 points during the game.

Engineers Surprise Dartmouth
Their next match was with Dartmouth and we gave them the surprise of their lives. Although they outmatched us by far, they only gained one goal, in the first period, one in the second, and two in the third. Again the Techmen were not able to tally.

Our final loss came against Williams. Their defense gained four goals to our two, Waddin and Duffin made two tries. The outstanding offensive man for us was Roger Turgeon, center.

18 points. Unfortunately, four personnel faults kept him out of further action until almost the very end of the game.

In general, the team looked good and has seemed to have improved quite a bit since the start of the season. With a little more pre-game practice which was lacking before this game because of vacation, the results of this game could quite easily be reversed.

Frost Look Good
In the preliminary freshman game the Cardinal and Grey frosh got off to a fast start and a 3 point lead but were quickly tied at 12 1/2 and then lost the lead, never to recover it. The score for the end of the contest, but with 3 minutes to play, is looked as if the Frosh had a chance to win, but with only three points separating the two teams, the Red and White surged ahead and won, 71-62.

The frosh team was really hot and dunked in the phenomenal total of 23 points. The team itself, however, was playing rather loosely and did not have too tight a defense.

The next Varsity game is with Northeastern University this Friday night at 8:30 at home.

those students who do not have eligibility for consideration for I-I-A deferments, and who have never before received a student deferment or postponement to complete their current academic year.

A student who receives a I-I-A deferment until the end of his current academic year may in some instances receive a I-I-A deferment for the next year, General Hershey revealed. If during the academic year his work was such that he is in the prescribed upper portion of his class, or if he takes the Selective Service College Qualification Test and makes a score of 70 or better, the local board can consider him for a I-I-A deferment for the following academic year.

Local boards generally determine during the summer months to whom I-I-A deferments shall be granted for the next academic year.

In making their determination, they consider the student's class standing for the previous academic year as furnished by the school on Selective Service Form 100.

Whether a man is classified I-I-A or I-I-B is a deferred classification, and not a postponement of induction, General Hershey pointed out. At the end of the academic year, the local board must reexamine the classification to determine whether he qualifies for any classification other than I-I-A. Following the period the local board is reconsidering his case. A student has the right, if he is not deferred for another year, to enroll in the service of his choice, and his right to enroll in the service of his choice.

In June 1951, the Department of Defense rescinded the insurance agreement and have periodically extended the period until March 31, 1943. Therefore, any studentdesiring, in January, to enroll in the service of his choice will have the opportunity, General Hershey observed, and it appears probable that those students completing their academic year in June 1952, will also have ample opportunity to enroll in the service of their choice.

Lucky Tastes Better!

It takes fine tobacco to give you a better-tasting cigarette. And Lucky Strike means fine tobacco. But it takes something else, too—superior workmanship. You get fine, light, mild, good-tasting tobacco in the better-made cigarette. That's why Lucky tastes better. So, Be Happy—Go Lucky! Get a carton today!
