Hilton Takes New Post With Project Lincoln

Mr. Thomas L. Hilton resigned his duties as Assistant Dean of Students last Monday, February 4, 1952, to work on Project Lincoln, better known as the M.I.T. Radiation Laboratory. The laboratory is being set up under the sponsorship of the Office of Naval Research, has the ability to remember, act upon, the site of 3,000 times a second.

The former Assistant Dean of Students will be departing with a personnel of several hundred engineers and a host of government officials. "Mr. Hilton is a very valuable member of the team," said Mr. E. E. Johnson, Dean of the Graduate School.

Dr. Huntress Heads Summer Program

Dr. Ernest H. Huntress, just named to direct the School of Chemistry at the Institute in the fall, was appointed Director of the Institute's Summer Session, it was announced last Monday, February 4, 1952, to work on Project Lincoln, better known as the M.I.T. Radiation Laboratory. The laboratory is being set up under the sponsorship of the Office of Naval Research, has the ability to remember, act upon, the site of 3,000 times a second.

The former Assistant Dean of Students will be departing with a personnel of several hundred engineers and a host of government officials. "Mr. Hilton is a very valuable member of the team," said Mr. E. E. Johnson, Dean of the Graduate School.
