Practice emphasis at this moment is on hitting, throwing, and conditioning. The new pitching machine has sped up the hitting and line already provided a good deal in the acquisition of timing, and a correct swing in the majority of cases. It is hoped that with the addition of some hitting ability, a 1968 team will have an even better season than last year, despite the fact that there are only four hetero-

B. Loebell, '54, and Richard I. Singer, '63, from Walcott and Crafts re-
spectively. Walter H. Key, Jr., '64, of East Campus, was elected to the
Dormitory Committee to replace Joe Van Winkle, '63, who was
elected treasurer of Dorm Comm at the last meeting of Dorm Comm.

Other motions passed Wednesday night were suspension of a res-
dent for violation of dorm rules, and the rule that no liquor or alcoholic beverages will be al-
lowed in the new pool table room.

Also on the Railroad Company attempted to clear the tracks. A giant snow-
plow was caught in the wake of a

matured snowslide and toppled over the
precipice resulting in the death of
a passenger.

The biggest job is

where they are. The biggest job is
to maintain the Electrical Engineer-
ing Department in Building 50 and the adjacent buildings." Mr. Knapp also restated the Insti-
tute's policy of preserving West Campus for living and recreational
facilities, a policy which played an
important part in the planning of
these moves.

erected. Originally, it was planned to do the work when the main
core was frozen, but there was

been very little frost this year. As it
Now, the limestone base will soon be removed and the new
pole erected.

break down and wept. Meanwhile

of a

depop. In the midst of all of this a dope addict, who apparently was a little high on

of the staff, had to be given special shots by a doctor who happened to be aboard.

Escape at Last A Reality

Dr. Telkes is also a researcher in the field of Solar Energy and reality enough was this form of

energy that made his research possible. On Wednesday the sun shone and the raging blizzard stopped.

The passengers were instructed to wrap blankets around their feet to

serve as makeshift snowshoes. This

enabled them to travel over the top of

the snow. A long procession of people began the trip down the

highway below. A lane had been cut in this highway and cars were

waiting to take the passengers
down the mountain. A saucer train

was waiting there and they con-
tinued their trip to San Francisco.
