RCA Collection Goes To M.I.T.

Dana L. Farnsworth, M.D., medical director, announced late last night that the more than 500 students who have failed to have their compulsory chest X-ray taken during the current school year must have satisfied the requirement in order to receive their marks for this term. X-rays taken during the process will cost the students $5.00.

"With his distinguished background of experience in both engineering and administration, Admiral Cochran," said President Kiliman, "is admirably fitted to fill this major administrative post. I have no doubt that Admiral Cochran, who has demonstrated superb qualities of leadership as a naval engineer, is the man to fill this major administrative post to the satisfaction of the administrative division of the dean’s office to devote full time to teaching and research in chemical engineering, in which he has been a member of the faculty since 1930.

Admiral Cochran is at present on leave of absence to serve as head of the Federal Maritime Board in Washington. He is expected to resume his teaching from the Engineering during the coming summer.

Admiral Cochran was awarded the Mexican Campaign Medal in 1944, the Victory Medal, the World War II Victory Medal, the American Defense Service Medal, the American Theatre Medal, several Unit Citations and the Bronze Star Medal in 1942. He holds the Asiatic-Pacific Campaign Medal, which he was awarded in 1944, and the American Theatre Medal as well as the Victory Medal, World War II, both awarded in 1945. The David W. Taylor Medal Gold Medal for notable achievement in Naval Architecture and Marine Engineering was also awarded to Admiral Cochran in 1944. He is a member of the Royal Danish, Russian, and Polish Empires. The Navy bestowed upon Admiral Cochran the Distinguished Service Medal.

RCA Collection Goes To M.I.T.

A unique and distinguished collection of radio, presented to the National Broadcasting Corporation of America, will be formally dedicated in the Engineering Library at a special ceremony at two o’clock this Wednesday afternoon. In presenting the collection to the Institute, RCA, the manufacturer and wholesaler of radio and television apparatus, has expressed the desire that the Institute be privileged to exhibit the radioactive material and to make it available to students for research purposes.

The collection, which contains manuscript and printed material related to the discovery and development of radio and the growth of the radio industry, forms a documentary record of over half a century in its special field. Its diverse contents include over 5,000 volumes.

Sponsored by the Board of Trustees, the collection will be housed in the space vacated by the present library materials. The present library materials will be moved to the Sloan Building, starting Thursday, April 17. The move is expected to take about a week.

Books and materials of the Dewey Library will be moved to their new location in the Sloan Building, starting Thursday, April 17. The move is expected to take about a week.
