**Acoustical Laboratory Develops New Speaker**

Five months of research in the Institute's Acoustical Laboratory has resulted in a new speaker for home use which has at last been completed. Work on the speaker was completed just in time for it to be demonstrated at MIT's House-Week end. Demonstrations will be given in the D. C. Jackson Hall of Science from 1 to 5 P.M. on June 10. The new sound reproducing system, which is designed for home use, will rival present speakers costing hundreds of dollars.

**Civil Engineering**

The Central Exhibit of the Department of Civil and Sanitary Engineering will include exhibits indicating the scope of the activities of the individual laboratories which will be in operation during Open House. This exhibit also includes a model of the Surveying Camp, surveying instruments, plans and maps, photographs of construction now under construction, together with student designs of airports, highways and structures.

Motion pictures of the construction of the New Jersey Turnpike, ruled earth dams and natural waterways of the Institute's new Reservoir No. 1-06. Demonstrations sponsored by the Laboratory of Ocean Engineering (Romeo, 1-335), and 365 and 371) include quicksand, the mixing of concrete with water, and the drying of soil in the form of a plaster sample.

The exhibit in the Hydrodynamics Laboratory will include demonstrations of a breaking wave on a beach, shook wave patterns around a seashore artificial.

**Development**

The freshman meet figures to be most exciting. Four teams, all but each team undefeated to date. The captains are: Walter D. Hulme, a junior, John Q. Chilton, a junior, and Jerry Houghton the third year student. The doors will be thrown open to the visitors who will be invited to meet the players and see what is going on. As an entrance fee of five cents will be charged, the funds will be used for the benefit of the junior class in the near future.
