Sloan Fellowships Granted To 18 Industrial Execs

Eighteen young industrial executives have been awarded Alfred P. Sloan Fellowships for the Executive Development Program at the Institute. These men, commended by their employers as showing unusual promise for industrial leadership, have been selected in a nationwide competition, and will receive grants up to $3,720.

In announcing the fellowship awards, Professor Gerald B. Tallman, Director of M.I.T.'s Executive Development Program, said:

"This program allows a select group of men with a mature viewpoint, seasoned by ten years of practical business experience, to return to participate in an intensive one-year study of the economic, social and management problems of industrial administration. The advantages of building some part of a man's education on a background of practical experience is widely recognized, but for most men it remains an unattainable dream.

"The establishment of the new School of Industrial Management at the Institute has allowed an increase in the number of fellowships and provides an enriched opportunity for realistic study of the problems of industrial leadership. Our faith in the value of a year-long period of post-industrial study is increasingly supported by the record of industrial leadership achieved by former Sloan Fellows."
