Class Smoking is Disapproved, Say Students in Poll

If you are a freshman coed, you are the least likely among students to approve of smoking in the classroom, according to results of a national poll of student opinion. Students in general disapprove of smoking in the classroom two to one, but freshmen and women are much stronger in their disapproval. Most frequent reason given for opposition to the practice is consideration for nonsmokers. "Its downright irritating to the people who don't smoke," said one freshman at Belleville Junior College, "and the classroom is not one of those places."

There is also an unmistakable trend towards approval of students smoking during classroom sessions.

The results:

Approve ........ 9 per cent
Disapprove ....... 58 percent
No opinion ........ 33 percent

As might be expected, more men than women approve of classroom smoking. There is also an unmistakable trend towards approval from freshmen (approve, 42 per cent) to graduate students (approve, 25 per cent) to males (approve, 34 per cent).

Fresmen in Poll Disapproved, Say Survey

There's a time and place for everything," says a disapproving freshman at Belleville Junior College, "and the classroom is not one of those places."
