EXHIBITION
Models of inventions by Leonardo da Vinci are on display in the Lobby of Building 7 (every day) and in the New Gallery of Charles Hayden Memorial Library (Monday through Fridays, 9:00 a.m.-5:00 p.m.) through October 5.

CALENDAR OF EVENTS
The Calendar of Events appears in THE TECH on Tuesdays with announcements for the following week. Notices, typewritten and signed, must be in the Office of the Editor, Room 7-304, not later than noon on Thursday prior to the date of publication. Material for the Calendar of October 1-October 7 is due September 25.

Open letter to members of the Class of '56:

Before you arrive at M.I.T., you may think that all your troubles would be solved at the hand of the Sophomore class. During your first days on campus, your tokens of welcome would come at the rate of ten per minute. As time passes, however, you will find that the Sophomore class is as busy as a bee, and as interested in your well-being as are the members of your own class. The Sophomore class is probably the largest and most active student organization on campus, and its purpose is to assist you in your transition to M.I.T.

The Sophomore class is not a secret society, nor does it have any formal structure. It is simply a group of students who are willing to devote a few hours sleep to make your stay at M.I.T. a more pleasant one. We are certain, therefore, that you will not suffer anything more serious than a slight soaking or the loss of a few hours' sleep. We are certain, therefore, that you will not suffer anything more serious than a slight soaking or the loss of a few hours' sleep. We are certain, therefore, that you will not suffer anything more serious than a slight soaking or the loss of a few hours' sleep. We are certain, therefore, that you will not suffer anything more serious than a slight soaking or the loss of a few hours' sleep. We are certain, therefore, that you will not suffer anything more serious than a slight soaking or the loss of a few hours' sleep.

The Freshman hazing program will result in a series of unfortunate events, and we feel that the presence of Frosh hazing is necessary to further your quick absorption into the M.I.T. way of life through the development of your interest in school, your class, and your fellow students. If, in some way, how help you to achieve a greater appreciation of our school and its many opportunities, then the program can become successful.

Most of the hazing can be purchased. Time is unique because you cannot buy it. A student's time is divided among classes, recreation, and studying. Each of these activities can help you at any time you will, and we are very sure that you will find the time uniquely enjoyable. Therefore, every student must try to develop a balance of recreation, study, and fun. Obviously, time-saving cannot be accomplished by increasing the efficiency with which you prepare for classes.

HOW?
How is recognized by many students as a test of maturity. It is advisable to begin studying in your classes and to develop your techniques for efficient studying. A student must be able to study efficiently if he is to succeed in his work and to continue to grow. Time-saving can be accomplished by improving your efficiency in study, and the student who is able to study efficiently will be able to complete his work in a shorter time.

SCHOLARSHIPS

Choral Society. Rehearsal. Room 2-190, 7:30 p.m. New members are welcome.

The Tech

SCHOLARSHIPS

(Continued From Page 1)

Winners of the Overseas awards are:

Alice C. Chang, '55, in the Polytechnic Institute of Milan, Italy.
Herbert R. Frank, G, in Metallurgy, Austria.
Paula E. Janzen, '55, in Chemical Engineering, Austria.
Julius W. Roth, Al. Arch. '52, who will study in Italy.
John L. Enos, '49, who will study in the Polytechnic Institute of Milan.
Frederick R. Bentsel, '50, who will study in Italy.

Winners of the overseas awards receive test of mettle in the sometimes exasperating world of technology. Setting aside the great demands, sufficient recreation, study and recreation, eating and sleeping, the student is divided four ways—classes, preparation, recreation, eating and sleeping.

Although there are a number of organizations with the purpose of encouraging the trades, hazing is quite common, particularly amongst non-resident students. Classes in the past have found that the trades can give a group of strangers some degree of cohesion and a sense of belonging. You should not expect it to be a difficult one to keep under control. The student who is able to study efficiently will be able to complete his work in a shorter time.

Field Day. Every one has always polled over into the arena of physical sports. The tradition is that the competition means a great deal to some, while in recent years, the traditions have died out. Immediately after World War II, with many returning GI's and freshmen housed in the temporary Building 21 Barracks, running pitched battles were the rule. Back in 1942, the freshman class stretched a banner between two flagpoles in the campus. The banner bore a banner which read: "Field Day is for Field Day."

In the frenzied Cane Rush, preceded by the frenzied Glove Fight, the freshman class was known as the freshly christened Glove Fight.
