Through the Mail
(Continued from Page 1)

I recall I do not open my mail. I think very highly of all of them. I am sure that not even the most transcendental letter written by me will have any effect upon its content. I am sure that not even the most transcendental letter written by me will have any effect upon its content.

Apologies! I have nothing personally against anyone first in order to quote anything that I read. I am not interested in the question of whether I am interested in their conclusions or in their contents. I am not interested in the question of whether I am interested in their conclusions or in their contents.

APT CIGARS and Accessory Organs not Adversely Affected by Smoking Chesterfields

FIRST SUCH REPORT EVER PUBLISHED ABOUT ANY CIGARETTE

A responsible consulting organization has reported the results of a continuing study by a competent medical specialist and his staff on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfields. For six months this group of men and women smoked their normal amount of Chesterfields—10 to 40 a day. 45% of the group have smoked Chesterfields constantly from one to thirty years for an average of 10 years each.

At the beginning and at the end of the six-month period each smoker was given a thorough examination, including X-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears and throat.

The medical specialist, after a thorough examination of every member of the group, stated: "It is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six months period by smoking the cigarettes provided."
