Prof. Schell From Course XV Receives Wallace Clark Award

Professor Edwin H. Schell has received the Wallace Clark Award "for distinguished contributions to scientific research." Professor Schell is Head of the Department of Industrial Management at the Institute.

The Gilbreth Medal was awarded in 1928 by the Society for the Promotion of Engineering Education for "outstanding original contributions by a young industrial engineer of younger than 35 years of age." It is presented annually in the United States.

Professor Schell has been actively interested in the interdisciplinary fields of science, technology, and management. He has been a leading contributor to the field of industrial engineering, and his research has focused on the development of new methods for improving the efficiency of industrial processes.

Industrial History Study By Morison

Explain the historical context of the study of industrial history. The study of industrial history is significant because it helps us understand the development of modern society and the role of technology in shaping it.

Industry Study By Morison

Industries have a lasting influence on society, affecting the way we live and work. They shape our economy and culture, and their impact is felt in every aspect of our lives. Studying industrial history can help us understand the past and present of our world.

Theory Emphasized In Freshman M12

Three special M12 sections are being offered this semester. The sections are designed to introduce students to the basics of American industry, emphasizing the importance of productivity and efficiency. Each section will focus on different aspects of industrial management, with a strong emphasis on case studies and practical applications.
