Elections

Discrimination is a human fault which should be eliminated completely. I am in favor of the Interfraternity Conference handling this problem. and opposed to any contrary action by the Institute Committee.

I have been president of the student body for four years. My views on the issues of the Class of 1956 are:

1. - The election of the student body president by the student body itself is preferable.
2. - The establishment of a permanent committee to study racial discrimination.
3. - A more efficient distribution of student activity funds, so as to obtain the maximum possible benefits for the student body.
4. - In four years our class will be the leader of student government. It is necessary then, for our initial organization to be sound and efficient. Therefore, we must have capable and interested leaders.

"It is to serve the class in this period of formation, that I seek your vote on March 3." Garry L. Quim - Freshman Council and T.E.N.

Statement: It will be the duty of your president to work for you, and to make the Class of 1956 as truly great as it can be. As a member of the Institute Committee, he should represent you personally and in spirit. Also, the Freshman Council needs reorganization; it is the leader of student government. It is necessary then, for our initial organization to be sound and efficient. Therefore, we must have capable and interested leaders.
