BATTERY ADDITIVE

(Continued from Page 3)

"In conducting these tests, Profes-
sor Weber served without compensa-
tion, and M.I.T. made no charge for
the use of its facilities. Neither Pro-
fessor Weber nor any of the staff
members who assisted him had any
financial interest in this or any simi-
lar product or received any fees at
any time for the testing of this addi-
tive."

"The tests were made under Pro-
fessor Weber's direction as an inde-
pendent study without reference to
earlier investigations, and a report
was submitted to the Senate com-
mittee in December. He reported that
an evaluation of how the product
would act in general use could be
obtained only after more extensive
experiments and after field tests. Thus, Professor Weber reported in ef-
fect that from his laboratory tests
it was unjustifiable to conclude that
the battery additive did or did not
have commercial value. His report
and that of the Bureau of Standards
indicate a difference in judgment as
to the conclusiveness of limited lab-
aboratory tests. It is not unusual for
objective scientific tests to be sub-
ject to different interpretations or for dif-
fferences of opinion to occur in good
faith."

"At no point in Professor Weber's
report is there any criticism of any
previous tests on this product, for
none was reviewed. The scientific in-
tegrity of the Bureau of Standards
has never been questioned by II.I.T.
or by Professor Weber and they
never intended that the report should
suggest such a question."
