**Military Day**

(Continued from page 1)

for the air force cadets was awarded to Cadet Technical Sergeant Anthony Tavano '54. The MIT Professor of Air Science and Tactics Senior Medal was awarded to Cadet Major Thomas Thys '56. The same medal for Juniors was awarded to Cadet Sergeant Robert H. Murphy '54. The Sophomore Air Science Medal was awarded to Cadet Airman Second Class Franke H. Banner '56. The Freshman Air Science Medal is not the important factor, but rather publicity for the Institute is the true fact. The Institute has never been known for its great athletic teams, and let us hope it never will have to be.

Football, whether it be of the Field Day variety, or on an intercollegiate level, remains one of the most exciting sports to participate in. It is about time that the men who take part in the sport get some recognition for their work. It makes no difference whether the Freshman Field Day team, or as a representative of the Institute, except in the altar role they will have equipment, deciding a team that can carry themselves as a team should.

It is very important that the opinions of the student body in general in this subject be made known. Any communications concerning freshman football should be addressed to the Freshman Football Committee, Walker Memorial, and will be very welcome.

**Athletic Award**

When one high official in the Athletic Association was approached with the idea of freshman football, he stated that the Institute would not cooperate because the proposed team would not have the needed equipment and good coaching, mainly on the same basis as the other Field Day sports. As mentioned before in THE TECH, it seems, is not the important factor, but rather publicity for the Institute is the true fact. As far as this paper can see, the Institute should draw a larger crowd than any freshman football battle in early November, and will be very welcome.

The Freshman Air Science Medal is not the important factor, but rather publicity for the Institute is the true fact. The Institute has never been known for its great athletic teams, and let us hope it never will have to be.

**SUMMER EMPLOYMENT**

We can again offer students pleasant, congenial, remunerative outside employment. If accepted, we will train and guarantee you $55.00 weekly while learning. After the training period, we will find students that can equal the average earning of $80.00 to $125.00 weekly established by other college employees.

A personal interview will be arranged at your convenience.

**At its higher quality...**

With all its higher quality... Chevrolents is lowest-priced!

Further ahead than ever in quality... yet the lowest-priced full-size car... in sharply greater economy of operation!

Imaginative — the most original car in its field, with new Fashion-First Bodies by Fisher that set the standard of styling, reimbursed out. The most powerful car on the road, with user choice of a new 115-h.p. "Blue-Flame" high-compression engine or greatly improved 100-h.p. "Thrift-King" high-compression engine.

Yet, with all these new and exclusive advantages, there is no increase in Chevrolet prices, and it remains the lowest-priced line in its field!

Yes, indeed, only Chevrolet gives such excellence with such economy. Come in and prove it at your earliest convenience.

*Contributes to deserving academic recognition and 115-h. p. "Blue-Flame" engine optional on Bel Air and "Two-Ten" models at extra cost.*

**The Tech**

FRIDAY, MAY 15, 1953

The Freshman Air Force Scholastic and Defense Medals were awarded to Cadet Charles Diamond, John MacLaughlin, Russell Scherlehart, and David Zito.
