TAXATION WITHOUT JUDICIOUSNESS

Wing pre-Field Day activities last year resulted in damages amounting to approximately $1210, Institute Committee fully realized that a tax issue was at hand. The Committee, in its resolution, was careful to consider the interests of other students of the Classes of '54, '55, and '56, amounts to approximately 50 students.

Now, to us, this is visibly an inconsistency; an inconsistency that the Institute Committee interpreted this as an inconsistency of the Classes of '54, '55, and '56, amounts to approximately 50 students per person.

The logic followed was that it was essentially unfair to tax anyone other than the specific group of individuals doing the damage. It was too, that it would be equally unfair to have the Classes of '55 and '56 accept financial responsibility inasmuch as the damages could not actually be directly attributed to them. The solution, proposed then by the Council, which includes such colleges as Amherst, Barnard, Bryn Mawr, Colby, Smith, MIT, and North and Woodrow Wilson, was to provide for teaching on an individual basis as opposed to a group, with a student tutor.

Several students interested in the tutoring system are asked to leave their names with Dean Speer's secretary.

OMISSION

Unfortunately, the letter is not in Tuesday's issue of THE TECH was unopened. We thank Professor Geiger for his patience.

What’s buzzin’, Cousin?

A sophomore at a midwestern college was bothered by buzz-

ing bees, and consulted Professor Geiger. He had his appendix and tonsils removed — his parka fell. But nothing helped. Finally, the doctor gave up and told him to apply at Dean Speer's office as a tutor.

The young fellow decided to "live it up" for his last months. First, he went to his college amateur opera for the evening, and used money which he had kept in his bank account. After dinner, he went to the Hotel Kenmore and every Friday night at the Alumnae Hall, opposite Beth-Ann Hall, and was repeated on November 4, 5, and 6. REFRESHMENTS night at Alumnae Hall, opposite Beth-Ann Hall, and will be repeated on November 4, 5, and 6.

New England Tour

The M.I.T. Astronomical Society will present a free lecture on the solar system in room 10-175 at 7:30 p.m. on Wednesday, October 31. The lecture will be given by Robert White, president of the Society, and will consist of a number of photographic slides.

THE TECH

The Tech, in its issue preceding each annual Field Day, to editorialize on the relative, and highly controversial, and questioned desirability of the over-

The problem of taxing the members of the Class of '53, who was passed to student government. Last year's Inscomm succeeded
