Geneva Conference
(Continued from page 1)
under certain circumstances, be pro-
pelled to place its forces in Indo-
China; and the President, Mr. Dal-
it, and others, have underscored the
high strategic importance attached
to the outcome of such action.
Possible Solution
The elements in a solution have
long been clear: an effective West-
ern military power to operate as a
shield to the development of effec-
tive Vietnamese military and politi-
cal strength among the Viet-
name. The missing element has been
a convention in Viet-Nam that the
West really stands for true indepen-
dence; and Viet Minh has exploited
this gap in Western policy with sus-
ceptible. It is in the teeth of our diplo-
macy is to ease the French over
their unwillingness to consider any
other steps' to strengthen the soli-
darity alone in Indo-China, without
world support. The French will not
be al\pened the French for clinging to
their Allied commitments in Indo-
China, without some recognition, tak-
ing heavy losses over the years in a
bitter jungle war, national pride and
moral national in-
terests have been almost all they have
to cling to. A second task of our diplo-
macy is to ease the French over
this impending transition. Our willing-
ness, if necessary, to share the mil-
itary effort in Indo-China really
might help, in this respect; but other
steps to strengthen the soli-
darity of the alliances may be in or-
er, notably the light of Moscow's
recent blandishments concerning a
European Security Pact.

The duration of each of the above undergraduate Courses is four academic years and leads
to the Bachelor's degree, with the following exceptions: (1) Architecture, which is a five-
year course leading to the Bachelor's degree in Architectural Engineering; (2) Chemical Biology, Food Technology, Five Year Courses, Physical Biology, and the Cooperative Course in Electrical Engineering, which extend over a pe-
riod of five years and lead to the Bachelor's degree and the Master's degree; (3) Science Teach-
ing, which is of five year's duration and leads to the degree of Bachelor of Science from the Massa-
achusetts Institute of Technology and the degree of Master of Arts in Teaching from Harvard
University.
Graduate study may be pursued in Textile Technology, Ceramics, Sanitary Engineering, and
in most of the above professional Courses. The Master's and Doctor's degrees are offered in most
of these fields.
For information about admission, communicate with the Director of Admissions. The Catalogue for
the academic year will be sent free on request.
