The approval by Inscamim at the meeting Wednesday of the completed facilities of the hospital in Brookhaven will be demonstrated using air-INuerLb

2. At the "Propeller Tunnel" in Room 5-217, the educational pro-

policies can be readily observed, as well as the techniques of measurement of the power of the propel-

lier 3. In the Ship Model Towing Tank located in the basement of Building 46, a ship model will move through calm water and then through waves. One can compare the motion of the ship as it glides gracefuly through the calm water with the violent pitching and heaving of the vessel as it moves into waves. The visitor will also have the opportunity to observe the special electric servos used for the control of the ship's motion.

4. In Room 5-215, the educational process in the study of Naval Architectu-

turization of active space social and recreational areas, and commercial space in the building (5) an a-

The main concentration of effort for the Committee during the next year will be in the field of publicity. The Committee will encourage the interest of students, administration and alumni "with the intention of de-

opher new and interesting methods of raising funds to finance this construction.

in the country. The ship models will be on display during the Open House and will contain many displays and mod-

The Chemical Engineering

(Continued on page 3)

The Preliminary plans for the con-

ing other ship models will be on dis-

Marine Engineering

The Department of Naval Architectu-

ture and Marine Engineering at M.I.T. will be demonstrated. Here the information on various materials and the type of work and study which prepares the student professionally for the design and construction of your ship.

Economics and Engineering

The Economics and Social Sciences Department invites groups of the In-

Economizing for the first time for all recognize the committee during the next meeting. The M.I.T.
