New laboratories dedicated to the fundamental research which will expel the root pesky potential of electronic and nuclear science will be built as a memorial to the Institute's late chairman, Dr. Karl T. Compton. Speaking at an Installation and dedication ceremony Dr. Compton yesterday, announced plans for building the Institute's first extension in almost 30 years.

Preliminary drawings for a $25,000,000 building have already been made by Skidmore, Owings and Merrill architects of New York. In addition, Dr. Killian announced, a fund of $5,000,000 will be provided for technical support of the Institute's work in these fields.

Speaking of the scientific and professional contributions of Dr. Compton, Dean George R. Harrison of the M.I.T. School of Science pointed out that Dr. Compton was the first person to recognize the tremendous importance of fundamental research in the field of atomic and of nuclear science. He supported the institutionally the work in these fields, and one of his great hopes was the establishment of a national extension of the fine research quarters of the Empire State Laboratories.

Dr. Killian said today, "has been carried out at M.I.T. in greatly reduced physical buildings which were erected for urgent research during the war years."

In these plans, Dr. Killian said, the Institute is aware of the continuing support of the M.I.T. Corporation's extension of the Institute's endowment in the eyes of a broad auditorium, Rohaesians are on Monday nights from 7:30 to 9:30 in Room 2-36.

This season's program includes a concert with members of the Boston Symphony Orchestra in Sanders Theatre on November 13, with the Brahmans' Maze and Mouss's Requiem and A. Schumann performed.

In May, the Choral Society will assist in the recording of the new symphony with a performance of Haydn's Creation at the Institute and a work by Aaron Copland which is being composed for the occasion.

Membership consists of students, graduates, faculty, staff and members of the Institute. Friends of friends are and open to all people. The Choral Society is a male and female a cappella ensemble.

In June, the Choral Society will assist in the recording of the new symphony with a performance of Haydn's Creation at the Institute and a work by Aaron Copland which is being composed for the occasion.

Membership consists of students, graduates, faculty, staff and members of the Institute. Friends of friends are and open to all people. The Choral Society is a male and female a cappella ensemble.
