BANY—A new cow has been grazing outside the Commons for a week. It has been milking thirsty students every day. Many mothers recommend her brand. But who’s going to recom-

mer a satisfactory method of mak-

ing the民众 work? As much as thirty cents has been spent in futile attempts to taste the nectar of an orange. Good fortune struck for one of a hundred when the machine sold "mill" and paid off two miles for the price of a half. The cow seems to conventionally run dry when money is deposited. . . . If everyone has to continue milking the machine, it will start spurring milk shakes and orange flats.
