**NORTHEASTERN, BOSTON** — This seems to be becoming a "poets' corner."

Ode to a Lonely Glass of Beer

Born in the brewery, bred in the wood,

I knew exactly what's behind that question, Don, because the same thing crossed my mind when I first graduated and looked around for a job. That was about seventeen years ago, when the Du Pont Company was much smaller than it is today. And there's a large factor in the answer, Don. Those advancement and growth of any employee depends to a considerable degree on the advancement and growth of his employer. Promotion possibilities abound and are good in an expanding organization like Du Pont.

Right now, for example, construction is in progress on three new plants. That means many new opportunities for promotion for young engineers. And, in my experience, I have found it is a fundamental principle of Du Pont to promote from within the organization—on merit.

My own field, development work, is a natural for a young graduate, because it's one of the fundamental branches of engineering at Du Pont. Here, you can complete new plants to design, novel equipment problems to work on, new processes to pioneer—all sorts of interesting work for a man who wants a challenge. Many of the problems will involve cost studies and many will require evaluation in a pilot plant—but, in every case, they'll provide the satisfaction which comes from working with people you like and respect.

Don Sundstrom asks:

**What are my chances for advancement in a big firm like Du Pont?**

Jerry Risser answers:

---

**THE COLLEGE WORLD**

**BOSTON** — This is a rare event for music fans. Dartmouth is presenting its annual Dartmouth College Orchestra at T.C.A., box office, Filene's, and Jor- dan's.

I think I knew exactly what's behind that question, Don, because the same thing crossed my mind when I first graduated and looked around for a job. That was about seventeen years ago, when the Du Pont Company was much smaller than it is today. And there's a large factor in the answer, Don. Those advancement and growth of any employee depends to a considerable degree on the advancement and growth of his employer. Promotion possibilities abound and are good in an expanding organization like Du Pont.

Right now, for example, construction is in progress on three new plants. That means many new opportunities for promotion for young engineers. And, in my experience, I have found it is a fundamental principle of Du Pont to promote from within the organization—on merit.

My own field, development work, is a natural for a young graduate, because it's one of the fundamental branches of engineering at Du Pont. Here, you can complete new plants to design, novel equipment problems to work on, new processes to pioneer—all sorts of interesting work for a man who wants a challenge. Many of the problems will involve cost studies and many will require evaluation in a pilot plant—but, in every case, they'll provide the satisfaction which comes from working with people you like and respect.

All in all, Don, your chances of advancement are mighty good at Du Pont!
