Choral Society Hailed In Outstanding Performance

The Tech Society membership was enthusiastic in their appreciation of the performance. The conductor, Kenneth V. Lumsden, received a standing ovation at the close of the evening. The concert was well received by both the audience and the critics. The program consisted of a varied selection of choral works, ranging from classical to contemporary pieces. The vocalists demonstrated a high level of skill and artistry, with each performer contributing to the overall excellence of the performance.

The Music Department

The music department announced the following events for the coming weeks:

- Faculty recital on January 12th
- Student orchestra on January 14th
- Chamber music concert on January 16th
- Wind ensemble on January 18th
- Symphony orchestra on January 20th

The department also reminded students to register for the upcoming music classes and to attend the upcoming recitals and concerts.

Calendar of Events

from January 12 through January 19, 1955

Wednesday, January 12

Astronomy Department

- Lecture: "Self-Excited Fluid Oscillations in Atmosphere" by Dr. Wesley E. Nyborg, Brown University. Room 720E-325, 4:00 p.m.
- Meteorology Department

- Seminar: "Analysis of Diffusion Couples by X-ray Photography" by Dr. James Clancy, Cornell University. Room 10-250, 3:00 p.m. Free tickets available in the Music Office.

Friday, January 14

Mechanical Engineering Department

- Seminar: "A New Method of Treating Boundary Conditions for Steady-State Thermal Problems" by Mr. J. F. Rose. Room 3-570, 3:00 p.m. Coffee and cookies will be served in the Mechanical Engineering Lounge.

Saturday, January 15

American Chemical Society—Northeastern Section

- Symposium on Ionophoresis by Prof. N. M. Natale, Chemistry, College of Pharmacy, University of Cincinnati. Room 10-190, 9:00 a.m.-1:00 p.m. Admission: $1.00.

Sunday, January 16

Humanities Society

- Panel discussion on "Recent Trends in the Study of Classical Antiquity." Panelists: Prof. John E. Allen; Prof. John H. Irvine; Prof. S. J. Moore; and Prof. J. A. Long. Language Hall, 2:00-4:00 p.m.

Monday, January 17

Microbiology Department

- Lecture: "Immunity and Specificity in Animal Immune Systems." by Dr. Oliver C. Smithies, Rockefeller University. Room 3-440, 11:00 a.m.-12:00 noon. Admission: Free.

Tuesday, January 18

Metalurgical Department

- Seminar: "Dissolution Analysis of Copper by X-ray Absorption." by Prof. R. T. O'Brien. Room 4-370, 4:00 p.m.
- Physics Department

Wednesday, January 19

Varsity Wrestling Team

- Meet with Williams College. Room 20E-225, 4:00 p.m. Tea will be served in Room 2-290 at 4:30 p.m.
- Boxing Team

- Meet with Tufts University. Room 10-250, 3:00 p.m. Free tickets available in the Music Office.

Thursday, January 20

Oceanography Department

- Seminar: "The Geology of Recent Marine Depositional Environments." by Dr. Allen F. Noble, Harvard University. Room 10-250, 3:00 p.m. Free tickets available in the Music Office.

Friday, January 21

Mechanical Engineering Department

- Seminar: "A Study of the Fatigue Life of Steel in Service." by Prof. John V. Kline, Massachusetts Institute of Technology. Room 10-250, 3:00 p.m. Free tickets available in the Music Office.

Calendar of Events

See page 3 for the complete list of events for the week of January 12-19.
