Tech Wrestlers Blank B.U. 28-0 in Mat Massacre

A rejuvenated team, both in personnel and spirit, made its best showing of the year, as the Beaver wrestlers outscored a weak Boston University squad on Saturday. With three falls, four decisions and a default, the engineers rolled up 28 points to BU's zero. The team was at full strength for the first time since winter vacation and wrestled with such spirit as if to make up for bad defeats suffered at the hands of Wesleyan and Williams.

Wrestling the best he ever did, Tony Vertich around heavyweight scored the fast fall to 11:1 of the second period. This was his first victory this season. In third of the 175's as a freshman Vertich has improved steadily all season. His next match is on Tuesday against Brown.

In the 195's, John Hirschi, '55 and Tom Calhoun also came through with four points at 147 and 157 pounds. Calhoun captured the 151 pound and has returned after four years in the army. He is a welcome addition at this weight level.

Appointing the victory for the first time after being sidelined for the first semester with a broken leg, and finally limping into the afternoon with a smile, Dormont, back in the 130-pound bracket, completely outclassed the number one man for two periods until the BV grappler made a last desperate effort to come back resulting in a free scoring last period with his take down on top 8-5. Mike Reaver started spectacularly with a takedown and near fall but the Beaver wrestler grouped up the area by the end of the second period. Reaver came back in the final round to add two more points to the increasing Tech score.

Tech holds big Tony Vertich 5'6 to almost six points and somehow managed to keep him bottled up on the boards.

In the fourth quarter, Vertich took over. He scored eight straight points and before the game was on ice. A freeze in which Vertich completely outclassed the number one man for two periods until the BV grappler made a last desperate effort to come back resulting in a free scoring last period with his take down on top 8-5. Mike Reaver started spectacularly with a takedown and near fall but the Beaver wrestler grouped up the area by the end of the second period. Reaver came back in the final round to add two more points to the increasing Tech score.

The bush leaguer

East Campus Downs ATO in Decisive Hoop Encounter

by Jerry Maxwell '57

A supercharged East Campus hoop squad out-sprinted, out-hustled, out-rebounded and out-played their Beaver brethren, last Sunday afternoon and emerged with a 42-37 victory, and one hand on the intramural basketball trophy.

The Easties, who have never forgone the ATO's for rating them last year's basketball laurels, strolled out like a house-a-fire. Their driving tactics were drawing fouls from the ATO zoom. Dick Safirstein '57 and Ken Meliere '57 led the scoring. At the end of the quarter Ted Zeits '57 was great on the boards for the whole game, mark two straight field goals, and the period ended with E. C. leading by 8.

The next period saw an even battle. ATO's guards began to hit, and the height began to do some work. A couple of Safirstein field goals and some free throws by Don Aerop 57 added another point to the E's lead. Throughout the half the hard-fighting men dominated the boards and displayed strong defense. The ATO's star guard John Stelling was disabled off, and this made a big difference.

The third period went much the same way as its predecessors, with the Easties coming out on top with a five point margin. Dick Fehnel '56 and Tony Ryan '57 turned in some of the best defensive performances this period.

The game was on ice. A freeze in which Vertich completely outclassed the number one man for two periods until the BV grappler made a last desperate effort to come back resulting in a free scoring last period with his take down on top 8-5. Mike Reaver started spectacularly with a takedown and near fall but the Beaver wrestler grouped up the area by the end of the second period. Reaver came back in the final round to add two more points to the increasing Tech score.

At TEMCO a two-fold opportunity awaits engineers, physicists and mathematicians who want to grow professionally.

At TEMCO a two-fold opportunity awaits engineers, physicists and mathematicians who want to grow professionally.

First, the entire engineering department is organized under the systems concept. This necessitates the combined services of civil, electrical, mechanical and aeronautical engineers, physicists and mathematicians, all of whom will have the opportunity — indeed, will be required — to become familiar with all areas in the aeronautical sciences. High payoff work will be demanded, of course, but will be conducted within the stimulating framework of transfer background in related fields. Your opportunities, potential for growth are unlimited.

Second, TEMCO offers a Master Engineering Training Program designed to develop tomorrow's engineering graduate into the systems engineers of the future. This program is a Graduate Study Plan leading to Master of Science degrees, and a Job Rotation Plan which permits you both to specialize without confinement and to diversify without division.

For further information on the opportunities awaiting you contact Engineering at TEMCO, write J. Neria Palley, Resident Engi neer, TEMCO Ac quisition Corp., P. O. Box 44, Dallas, Texas.
