The best ball for your game has the exclusive DURA-THIN COVER

Here's amazing new durability in a high-compression ball. The DURA-THIN COVER provides this great new Spalding D.O.T.® with real stuff resistance...keeps the D.O.T. uniform and true, even on roughed-high-iron shots. The new D.O.T. has a greater compactness for truer, more uniform flight. It's actually an economical ball for you to play.

And, with all this new durability, new D.O.Ts still offer the long, long carry every hard-hitter wants.

At school, or on your home course, make your next round a better one with this greatest of all golf balls, Spalding DURA-THIN DOTS.

Gus Schwarts '56 scored his fourth goal of the game with fifteen seconds remaining in a sudden death overtime to give the Beaver hockey team a 6-5 victory over the University of New Hampshire in the most thrilling game of the year. The 191-3 win is the second in the second period, the Engineers, led by Schwarts, who scored three consecutive goals, came roaring back to take a 5-4 edge. The Wildcats tied the score just past the halfway mark of the game in overtime and then Coach Bob mentioned this gave the Beavers an extra minute of offensive time and produced the scramble which put up Schwarts' score. This was the final game of the year for the Engineers and gave them a 5-1-1 record. It is quite good considering that it took several seasons to produce Tech's first victory.

Here is how the scoring went. Ber Goodson '57 took a Nick DiBona '55 pass at 9:30 of the first period and scored on a back hand slap shot making the score 1-0. Bob Johnson took the score to 2-0 in the 2nd period and the fourth goal coming at 11:45, on a shot by Captain Ben Martin. At 11:47 of the second period the Beavers had a 3-0 lead. Nick DiBona '56 took a pass from Nick DiBona and beat the Wildcat goalie on a clean angle shot from fifteen feet out. The next score came at 14:45 as Schwartz belted in a rebound assisted by the goalie. Captain Hal Wells '55 and the goalie's skate. Captain Wells' time at 12:15 as he got through the defense and scored the solo attempt. With less than a minute remaining in regulation time, the Wildcat goalie was taken out and the ensuing scramble in front of the Tech net almost came to a tie.

In the ten minute sudden death overtime, the Engineers outplayed the Wildcats but the New Hampshire goalie stopped many fine shots. At 8:29 the Beavers had a faceoff in their offensive zone and here Hank Durivage '57 became the fourth man in the line as Atkinson was taken out. ONF get the face-off but Wells and DiBona stopped the break away and fired the puck across the blue line. Junior John Atkinson's rebound was converted to a score by Schwarts to give the Beavers their second double overtime victory over New Hampshire this season.

Captain Harold Wells, Nick DiBona and Jim Bartsch played their final game for the Beavers. Wells scored once, DiBona had two assists, and Bartsch scored in the decisive drive for victory.

CONVARIABLES is coming to M.I.T. MARCH 10 and 11

TO INTERVIEW ELECTRICAL, MECHANICAL, AERONAUTICAL ENGINEERS ABOUT TO GRADUATE

At Convair, in (San Diego), smog-free San Diego, you will find the diversity of challenging, high-paying projects that offers you the unlimited career opportunity you seek.

This young country, beautiful, exciting country — the very heart of the busy, vital aircraft and missile industries. And good, young engineers are needed now to grow with new, long-range aircraft and missile programs.

You will find the Convair Engineering Department a genuine "engineer's engineering department" — imaginative, energetic, creative. You will discover the very latest engineering equipment, excellent working conditions, salary, personal job advancement, and opportunities for continuing education.

Remember these facts about Convair. Convair was awarded the Nation's first production missile contract and the first production missile guided weapon. Convair has the greatest diversity of aircraft engineering projects in the country, including high performance fighters, heavy bombers, large flying boars, transports, trainers, seaplane fighters, vertical take-off and landing aircraft and guided missiles.

Convair has a completely integrated electronic development program devoted to advanced development and design on missile guidance, avionics projects, radar systems and special cathode ray tubes.

You are invited to get full information about your career at Convair. Talk it over with our Convair Engineer on your campus soon.

GREAT CIVIL ENGINEERS interested in the field of aircraft structure are also invited to apply.

CONVAIL ENGINEERS WILL INTERVIEW ON YOUR CAMPUS MARCH 10 and 11

arange your personal interview through your Placement Bureau.
