Still... 

to remember her 

with TELEGRAMS!

If you've been senile with the miss don't despair! There's always time to make amends with telegram. Flush her a glorious birthday greeting in your own inimitable style. Her delivery on Western Union's special black will win her enduring devotion. You air—any way you look at it, telegrams are a guy's (and a gal's) best friend. Just call your helpful Western Union office.

ORDERs TO TAKE OUT

JOY FONG

CHINESE-AMERICAN FOOD

461 Mass Ave.
Cambridge

to travel and study abroad?

Take a university-sponsored trip via TWA this summer and enjoy full college credit while you travel.

Want to travel under your own steam? You can travel to any trip foreign country sponsored by the TWA. These trips include countries area visit to Europe, the Middle East, and Africa. Special offers are available for all inclusive programs and special TWA-operated Sky Tours service.

For information, call John H. Farley, Ph. D., Northwestern University, Air Mail Tours, Dept. CN, 380 Madison Ave., New York 17, N. Y. Be sure to mention Russian you wish to visit.

The M.I.T. Instrumentation Laboratory can provide qualified applicants with work affording professional advancement in the following fields:

**PHYSICS**
- Electronics
- Magnetic Amplifiers
- Classical Mechanics
- Servomechanisms

**ELECTRICAL, MECHANICAL AND AERONAUTICAL ENGINEERING**
- Applied Mathematics
- System Design
- Gyro Development
- Small Motors
- Flight Testing

The Laboratory’s activities — sponsored by the Air Force, the Navy, and private industry — center about a nucleus of personnel with unusual technical skills and of high professional caliber. The Laboratory is part of the M.I.T. Division of Defense Laboratories and is associated with the M.I.T. Department of Aeronautical Engineering. The Director of the M.I.T. Instrumentation Laboratory is Dr. C. S. Draper.

The Laboratory’s research and development activity carries most of its projects from initial conception to manufacturer’s prototype. The sponsor normally assigns production responsibilities to private industrial companies who depend upon Laboratory personnel for technical guidance.

The Laboratory is well equipped with necessary machine tools, computers, simulators, and electronic and mechanical testing devices. Many of which are located in air-conditioned, high professional caliber. The Laboratory is part of the M.I.T. Division of Defense Laboratories and is associated with the M.I.T. Department of Aeronautical Engineering. The Director of the M.I.T. Instrumentation Laboratory is Dr. C. S. Draper.

The Laboratory’s research and development activity carries most of its projects from initial conception to manufacturer’s prototype. The sponsor normally assigns production responsibilities to private industrial companies who depend upon Laboratory personnel for technical guidance.

The Laboratory is well equipped with necessary machine tools, computers, simulators, and electronic and mechanical testing devices. Many of which are located in air-conditioned, dust-free areas where fabrication, assembly and testing require extremely precise measurement. The Laboratory also operates a flight facility for the testing of airborne systems in reciprocating engine and jet aircraft.

A steady demand by industry for personnel who have improved their professional background with instrumentation Laboratory experience makes the Laboratory uniquely suited to “interning” recent graduates. These graduates work on front-line problems directed by experienced engineers in an atmosphere combining the best aspects of an academic environment with professionally significant assignments.

Staff Members may take courses for credit toward advanced degrees at M.I.T. while working full-time at the Laboratory. Salaries are appropriate to training and previous experience of the applicant. Additional information will be furnished upon request.
