Commons Subject To Liberalization: Burton And Baker Try New Systems

Burton Commons Committee in an announcement that starting Monday, April 18, will have its own non-alcoholic drink service. This is the Commons Room of Graduate house, which will have a new menu.

The Executive Committee of the Institute will hold its meeting on Monday, April 18. The meeting will be attended by all members present.

The appointment of Dr. Marshall C. Holloway as director of the Lincoln Laboratory was announced today by President Stassen of the Massachusetts Institute of Technology.

The Lincoln Laboratory, which is engaged in development of defense, is managed by MIT for the Army, Navy and Air Force. Dr. Holloway comes to MIT from the Los Alamos Scientific Laboratory in New Mexico. He has served since 1943 and has been intimately engaged in many scientific problems, including the development of the atomic bomb. His work has particularly contributed very substantialy. He has recently served in Washington as a consultant to the committee for the Director of Defense Research. It is now expected that he will assume his new duties early in May.

The Undergraduate Association, which is the governing body in its relations with the administration, must find a solution to this problem by ourselves, and not be unduly influenced by what has been done at other schools.

Dr. Holloway, a native of Oklahoma, was graduated in 1938 from the University of Florida. He took his degree of master of science in 1935 and his doctorate of philosophy in physics in 1938 at Cornell University. He taught at the University of California and has served in the Pacific Research Foundation from which he was called in 1943 to go with the "manhattan District" to Los Alamos.

Miss Holloway will come to Massachusetts Institute of Technology next fall. That is, after the student at the New Mexico Institute will graduate in June.

Dorm Weekend Begins April 29: Formal Scheduled in Baker House

On the weekend beginning Friday evening, April 29, Dormitory Council is sponsoring a Formal in Baker House. The program for the weekend includes a semiformal dance, an informal dinner, and numerous sports events.

The semiformal will take place on Friday evening, April 29, from 9:00 p.m. to midnight. It will begin at 6:00 p.m. with the formal dinner. The dancingsuggestions for a possible experiment in May will be directed to David Kleinman '56, present chairman of the East Campus Commons Committee.

On Saturday night, April 30, the Music for this evening's dancing will be supplied by Chuck Israel's Orchestra. Tickets, at 5.00 each include beer and hot dogs. Combined tickets for the two nights are $5.75 each and are available in the lobby of Building 52 or from the various social chairs in the Houses.

Beyer's Piano Concert Successful

The Lecture Series at MIT presented a recital by Dr. Beyer, an eminent pianist and teacher. The program was well received, and a review of the concert was published in the next issue of The Tech.

The pianist, Beyer, was born in Germany and has been associated with the University of Massachusetts since 1938. His program included works by Beethoven, Chopin, and Brahms. The recital was well received, and a review of the concert was published in the next issue of The Tech.

Beyer received an enthusiastic reception from the audience.
