CALENDAR OF EVENTS

Under a new plan of publication, the Calendar of Events will be distributed to the entire staff through the Institute's mails each Wednesday, with notices for the following eight days. Notices should be in the editor's office, Room 7-204, prior to the date of publication.

Material for the Calendar of October 12-19 is due October 1 later than noon on Thursday.

The Texp

12 Freshmen Give New Look To Coeds: Women's Dorm Residents Give Opinions

by J. Philip Brundage '56

This year's group of freshman coeds might well go down in history as the prettiest ever admitted to the Institute. The Freshman class contains a total of 12 coeds, seven of whom live at the women's dorm on Bay State Road. Six of the seven were available at the time of this interview for The Tech. These girls have come from as far as Texas, Italy, and the Caribbean, to take advantage of the educational opportunities offered here. They are favorably impressed with Tech, Techmen, and The Tech newspaper.

Three of the girls came here intending to major in physics: Georgia Elaine Beane from Kingston, Mass., plans to sing (she gave a short demonstration of her abilities in this field), dancing and painting (she claims to do "lousy landscapes"); Georgia intends to join the soprano ranks of the MIT Choral Society. Frances Edwards from Hillsdale, N. Y., likes skiing, hiking, and painting; she prefers the arts. She is greatly disappointed after the fact that people might spell her name using Francis instead of Frances. Carol Ann Diffey, a Texan from Dallas, does small enamel work, plays the piano, and has a big dog back in Texas. Myra Jones, a course XVI girl, from down in Newport News, Virginia, speaks with a strong southern drawl and pronounces her name "Maise." It would be of great scientific interest to get her into a conversation with one of our Swiss professors, the object being to see whether or not she could comprehend one another. Myra likes to play the piano, do fashion illustrating (she took art lessons), and plays the piano. She has one main fault to find with Techmen—they are not interested in baseball. Phyllis Butts, a sportswoman from New Berlin, Ohio, is planning to enter course IV-A. Phyllis goes in for mountain climbing, and hunting. Her present ambition is to kill a deer.
