Graduate Student Council Plans Meeting; To Discuss Role Of The Graduate Student, Nature Of Graduate School Of The Future

President's Annual Report Issued To Corporation; Need For More Fundamental Education; Stressed

Certain fields of technology have come to prominence in recent years because of "the magic of books" to all but the best educated. The University's President of the Massachusetts Institute of Technology, has made an annual report to the Corporation, is issued yesterday. It points out that many areas of technology are "still in their infancy" and that "the public is only beginning to realize the tremendous possibilities which lie ahead.

"Higher compensation and other attractions offered to engineers and other scientists and engineers who are considering better employment opportunities, is the main reason for the shortage of professional scientists," Dr. Kildall said. "It is estimated that the shortage of professional scientists, engineers and other scientific workers is now about 25,000.

"The problem is one of supply to meet the demand," the President added. "The shortage of professional scientists and other scientific workers is now about 25,000.

"A large number of new firms are being established in the United States and abroad, and the demand for trained scientists and engineers is expected to increase greatly in the years ahead.

"The need for more fundamental education is emphasized in the President's annual report to the Corporation," Dr. Killian said. "It is intended to re-stimulate the public interest in the sciences and to encourage more young men and women to enter these fields. The report, "Higher Compensation and Other Attractions Offered to Engineers and Scientists," is available from the Corporation.
