GRADUATES in Engineering, Mathematics, Physics

LOCKHEED AIRCRAFT CORPORATION
- California Division
- Georgia Division
- Missile Systems Division

All three divisions of Lockheed are engaged in a long-range expansion program in their fields of endeavor.

Six Phones Gone From Dormitories Of East Campus

Last week East Campus was the scene of extensive vandalism which resulted in the theft of several telephone units which served as Institute extensions in the dormitories. The phones taken were from Nichols, Holman and Crafts first floors in the Science House, and Monroe third and fourth level and Goodsall second floor in the "Palatial Domes". In each case the entire unit was ripped from the wall.

Professor C. E. Tucker, of the Department of Electrical Engineering, who is in charge of the Institute phone system has stated that these phones will not be replaced by the telephone company as they represent an original cost of twenty-five dollars a unit. If the phones are returned they will be reinstalled at a cost of approximately three dollars per unit. It has not yet been decided who will bear the cost.

On a previous occasion six phones were taken but were returned within a week's time. They were then put back into service.

The missing phones may be traced to an Institute committee, who has expressed a desire to see the units back in service as quickly as possible.

Ten of hearts. trumped a small heart in his hand and exited with a small trump. East was in the lead and had to lead from one of his kings, giving such his extra trick, and allowing six spades to be made.

At Lockheed in Marietta, Georgia

A $10,000,000 a month expansion program is well underway. It includes two new production plants, one of which is under one roof. The division is already one of the South's largest industries.

In addition, advanced research and development are underway on nuclear energy and its relationship to industry. A number of other highly significant research programs are augmenting the extensive production programs.

Separate interviews will be given for each division. Your Placement Officer will arrange an appointment for you.
