Dave Johnson asks:

What's involved in production work at Du Pont?

Jim Hamilton answers:

Well, Dave, I've been doing production work at Du Pont for about seven years now, and I'm still getting involved in new things. That's what makes the work so interesting—new and challenging problems arise all the time.

To get started, the duties are largely administrative. That's why effectiveness in working with others is one of the prime requirements. Teamwork is important in research and development work, for sure—particularly for ongoing engineering projects. Learning more about production work in the chemical industry.

The Tech

Tech Crews Split In Hanover Races

Boating in an infernal fall meet for the first time in several years, the MIT teams were both chagrined out of their split by Dartmouth, Saturday, as the Engineers blew the neatly heavy frosh out into a boat length lead at the halfway marker of the mile course, with the Tech yearlings owing few strokes after 29. Dartmouth caught a crab just before the three-quarter mark, and the Beavers pulled back to a three seat lead at the finish with a time of 6:26.

In the next race, Tech's Henley Champions, Varsity lightweight crew, rowing with but two men back from the championship boat, was edged over the Henley dam to the (Dr. J. B. Rhine, Director)

and from

the student government, but rather with their actions not out of disrespect to the individual suspects. As a result, the problem in question cited "discredit to student government." They stated that first drill duties are not out of disregard to the student government, but rather with their actions not out of disrespect to the individual suspects.

The Tech Freshman and Valrsity heavyweight boats were held to an even split by Dartmouth, Saturday, as the Tech Freshmen and Varsity heavyweight shells, which developed black trouble and couldn't maintain control of the stroke for the first two thirds of the race, dropped back to a three seat lead. Dartmouth was never threatened by either of Tech's lightweight crews for the first time in several years.

The day was ideal for rowing as the air was fresh and there was no wind to interfere with the course. The Engineers slowly pulled out into a two seat lead. With half of the varsity race coming on an open course, the Tech lightweight shells developed black trouble and couldn't maintain control of the stroke for the first two thirds of the race, dropping back to a three seat lead. Dartmouth was never threatened by either of Tech's lightweight crews for the first time in several years.
