HELICOPTERS are here to stay
but not to stay put

Like well-coordinated athletes, helicopters distinctly distinguish themselves in aviation. Because of their unique ability to move about quickly and surely in close quarters, modern helicopters have earned a remarkable reputation as the world's most versatile aircraft.

However, like most engineering triumphs today, rotary-winged aircraft present a stimulating challenge for tomorrow.

Certainly a bright future is assured. But the exciting details of that future remain to be discovered and worked out. Since Sikorsky Aircraft is the world's premier helicopter manufacturer, it naturally follows that the world looks to Sikorsky for continued leadership. And to provide the creative engineering abilities such leadership will demand in the future, Sikorsky looks to you.

Obviously, you want to choose your career wisely and well. Today there are countless fields in which you might invest the capital represented by your technical training and talent. It is our belief, though, that few of these fields can produce the dividends of satisfaction, the rewarding challenge and the possibility of career growth that you will find here. If you will write to Mr. Richard Frost, Assistant of our Personnel Department, he will gladly tell you more about Sikorsky Aircraft.
