Fellowship, Scholarship Grants Announced For Next School Year

by Charles Spangler '59

Two new educational grants, open to both graduate and undergraduate students, were announced this week by the Institute of International Education and the Inland Steel Corporation. Both grants are in the form of paid tuition plus additional funds for expenses, and are open for the 1956-1957 school year.

In announcing the grant, the Inland Steel Corporation disclosed the establishment of a total of 22 scholarships at 15 colleges and universities.

INSCOM

(The continued from page 1)

The Executive Committee report which presented the Foreign Student Summer Program problem. The report states that some foreign students receive "false impressions of MIT and America in general" due to mismanagement of the project. The Executive Committee is of the opinion that a new blood should be put into the FSSP, possibly in the form of graduate students and that a new foreign student exchange system should be set up.

The problem of activity profits was met by an Executive Committee motion which, if passed, would have each profit turned over to Ficoem to be used for the activities debts, with the surplus at the end of the year going into the Student Union Fund. The committee's last item of business dealt with fraternity hazing, and it was decided to turn this matter over to the IFC, at least until March 5.

The Activities Council report dealt heavily with the proposed new Financial Board for activities and the proposed method of finance which involves a fixed per cent of tuition going to activities support. This Peskin proposal was voted upon at the time it was generally favored by a 5-4 vote. Three members, however, abstained from the vote and expressed the opinion that the effects of such a change would make no difference to them as their activities receive no financial assistance.

The second part of the report of Activities Council dealt with the new election of Class B representatives. Now Eve, instead of the former two positions are open and an excellent turn out of eleven candidates have submitted petitions. In contrast to a former record of three candidates for two offices, Ballots have been sent out to be voted upon by various activities and must be returned by March 8.

engineers, scientists, physicists, mathematicians...

CAN YOU THINK BEYOND MACH 2?

Designing Airfoils Vehicles of the Future travelling at speeds so great that thin air becomes a blinding, solid wall... is the challenge that North American offers to aeronautical engineers and to specialists in most other sciences.

Join North American's engineering operations at Los Angeles. Here's where the F-100 SUPERSabre - holder of the world's first supersonic speed record—was designed and built. Share the knowledge and experiences that has led to North America's supersonic supremacy. Be a part of a compact team of top engineers and scientists. Work on the most advanced projects right from the start. Enjoy personal rewards and recognition from challenging assignments.

See your Placement Office for an appointment with the North American Representative, or write:
