Hazing Review Committee Formed; Jones Recommendations Disclosed

Undergraduate Association President Malcolm Jones '57, read his President's Report to Inscomm last Wednesday withholding any mention of student hazing. In an effort to head off any potential for trouble, the UAP, Jack Saloma '56, suggested that the position that existence of hotel in the current atmosphere of protests will be future meetings. Mr. Selden expressed his concern about the situation and his own personal philosophy. Those suspicions were confirmed in spe- cial statements that 34 separate topics. Jones felt that Inscomm should thoroughly discuss at the board before either of the end committees. The problem of communications was taken up at the next meeting. He felt that the two chief means of com- munication, The Tech and WTHB, are both lacking not only in their but their actual coverage of the news but also in the dissemination of the results of the production. Mr. Selden suggested that WTHB should expand its facilities and start broadcast- ing as soon as possible. The Tech was considered for a long time, and The should give students access in the ex- panding its circulation, in the fra- mes. The present UAP stated that the Student Council on Educational Policy has delved deeply into many academic problems in the past many years, but that there still remain challenging fields, such as student opinion on the curriculum and also on estab- lishing an honor system. He felt that student and faculty can and should work together as partners in areas of mutual concern and recommended that Inscomm authorize an honor society to investigate the poten- tial basis for considering plans for faculty committees.

For psychologists that lack years of geriatric counseling and counseling into the field of academic policy, the mental health of the student body and the faculty members is of utmost concern. During the past year, two significant developments have taken place in the field of geriatric counseling. First, the establishment of a new counseling center at MIT, and second, the establishment of a number of mental health clinics and programs on college campuses throughout the country. The problem of communications was the subject of many discussions last year, and the problem of communications was the subject of many discussions last year, and the two chief means of com- munication, The Tech and WTHB, are both lacking not only in their but their actual coverage of the news but also in the dissemination of the results of the production. He felt that student and faculty can and should work together as partners in areas of mutual concern and recommended that Inscomm authorize an honor society to investigate the poten- tial basis for considering plans for faculty committees.

Four steps were recommended for the implementation of Inscomm's rec- ommendations. First, the self-governing Committee Association. They say- the Committee Association should be organized complete- ly, and that the student body should be a part of the group meet with the Executive Committee of Inscomm to discuss its im- plications. Second, the student body should meet with the Committee Association to meet with the Committee Association. Third, the student body should complete the implementation of Inscomm's rec- ommendations for the establishment of the Committee Association on the second floor of Walker Memorial; and that (Continued on page 4)

Edward Hanley, Tech Graduate, To Speak At Annual Catholic Club Banquet Tomorrow

"Compatibility of Science and Religion in the Modern World" will be the theme of the annual Catholic Club dinner of the Technological College Catholic Club this year. The annual Catholic Club dinner of the Technological College Catholic Club will be held tomorrow night. Mr. Hanley, a native of Whitman, Mass., was graduated from the College of Arts and Sciences at MIT in 1941 and is presently employed as a research physicist at the Brookhaven National Laboratory. Other speakers will include the Rev. Francis J. Galvin, chairman of the physics department at Brown University; Dr. Donald D. Bradburn, M.D., president of the Medical Research and President of the Na- tional Academy of Sciences; Dr. Ralph J. Bunch, Under Secretary of the United Nations; Dr. Arthur N. Perlmutter, director of the Institute of Chemical Technology, and Dr. Al- len T. Waterman, director of the National Science Foundation.

The program of the evening activities was planned by the UAP under the presidency of Dr. James R. Killian Jr., President of the Institute and chairman of the New Corporation.
