Dramashop Anniversary Noted With Production Of "The Jubilee"

This week's plays are under the direction of Prof. Everingham, who has chosen casts of Techmen and female guests. For the first time the plays will be presented on the Little Theatre stage in "box" or room settings executed by students in conventional design as opposed to the abstraction seen, for example, in De- caskey's "Six Characters in Search Of An Author". "The Jubilee", as a comedy, will be played in a setting of white, gold, and somber brown.

Now one of the most popular college theatres in this area, the group has chosen what may well be its greatest challenge to date in these two plays. "The Jubilee" is a farce in the classic Repinian Cup, also stock style, with lots of action and as elements of dry charisma; "The Father" is probably the best known work of the world's greatest dramatist, Strindberg for his skill as a playwright, Strindberg created in "The Father" the battle of a domi-

Subject Of His Talk: "On Christian Unity"

"On Christian Unity" will be the subject of a lecture by the Rev. Dr. Georges Florovsky to be delivered to mosers in room 830 at 5 p.m. The Rev. Dr. Florovsky is an eminent authority on his subject. He served on the Commission of the World Council of Churches during the Council's formation period from 1958 to 1948 and is now a member of the Central Committee and of the Study Department of the World Council. He is also president of the Vice-Presidnt of charge of the National Council of Churches of Christ in the USA.

Within the past year Dr. Florovsky has been appointed to professorships at Columbia University and at the Union Theological Seminary. The list of international conferences and study groups he has participated in is impressive, as is that of the number of other schools at which he has lectured.

Rev. Dr. Florovsky was educated in Russia at the University of Odessa from which he graduated in 1911. He left Russia in 1916 and taught at the Orthodox Theological Institute in Paris, holding a professorship there from 1928 to 1948. Then he came to the United States.

This lecture, "On Christian Unity", is being sponsored by the United Christian Council in cooperation with its member group, the MIT Orthodox Christian Fellowship.

"There's opportunity in a growing company"

As an Engineer in the Transmission Section of Bell Telephone Company of Pennsylvania, Richard M. Walsh plans for the future.

"Our group's responsibility," says Dick, "is to see that we have sufficient facilities to handle present and future needs. Telephone usage is growing every year, and we keep up with this growth by keeping ahead of it.

"For instance, to meet the increasing demand for communication circuits in our area, we're adding 70,000 new channel miles this year alone, at a cost of $2,500,000. Laying new cable will give us 40,000 of those channel miles, and we'll get the other 30,000 through use of carrier equipment, which lets us send a number of long distance calls on each pair of wires simultaneously."

"Thus, though a cable might have only 300 pairs of wires, we can, with carrier, make it carry over 900 telephone calls at one time. Using carrier equipment to get extra circuits out of cable—which is expensive to make and lay—is an example of how we organize to give high-grade service at the lowest possible cost."
